The information will not be changed unless absolutely necessary and any change will be clearly indicated by an approved correction included in the profile.

General Information

Overview

This unit examines clinical assessment and diagnostic reasoning to recognise and respond to a patient's deteriorating condition with appropriate and timely actions. This unit will enhance your knowledge of serious adverse events such as unexpected death and cardiac arrest which often follow observable deterioration in the patient's condition. You will develop knowledge and skills in the early identification of deterioration, the initiation of prompt and effective action to minimise serious consequences, improve outcomes and lessen the level of intervention required to stabilise patients. The unit will focus on the underlying pathology of the patient's deteriorating condition and the interpretation of clinical manifestations to implement safe and effective nursing care. This unit will develop your theoretical knowledge of reflection in professional practice of nursing care coordination of the deteriorating patient.

Previous Student Feedback

Feedback, Recommendations and Responses

Every unit is reviewed for enhancement each year. At the most recent review, the following staff and student feedback items were identified and recommendations were made.

Feedback from Industry partners

Feedback

Industry partners need to be better onboarded to the partnership model.

Recommendation

This is valuable feedback. We will work with the HOC and industry partners when staff turnover occurs to ensure a smooth handover and onboarding to the partnership model. Ongoing discussions about assessment two are also needed in these early stages, particularly where facilities have large numbers of grads.
