General Information

Overview

In this unit you will build on the knowledge from the unit Advanced Practice Medical-Surgical Nursing 1. This unit provides you with the opportunity to develop expertise in the nursing care of people with chronic conditions and complex healthcare needs who experience medical and/or surgical interventions. Complexity of clinical presentations may be enhanced by individual genetic make-up and/or life experiences. The biophysical, pathophysiological, emotional and psychosocial capacities of people with chronic conditions indicate they may become more vulnerable to health and safety concerns and require planned nursing care to address these health complexities. You will plan comprehensive health assessments and nursing care, in partnership with people experiencing medical and/or surgical interventions and their families, to address their complex health needs.

Assessment Grading

This is a graded unit: your overall grade will be calculated from the marks or grades for each assessment task, based on the relative weightings shown in the table above. You must obtain an overall mark for the unit of at least 50%, or an overall grade of 'pass' in order to pass the unit. If any 'pass/fail' tasks are shown in the table above they must also be completed successfully ('pass' grade). You must also meet any minimum mark requirements specified for a particular assessment task, as detailed in the 'assessment task' section (note that in some instances, the minimum mark for a task may be greater than 50%). Consult the [University's Grades and Results Policy](#) for more details of interim results and final grades.
