The information will not be changed unless absolutely necessary and any change will be clearly indicated by an approved correction included in the profile.

General Information

Overview

In this unit you will build on the knowledge from the unit Advanced Practice Medical-Surgical Nursing 1. This unit provides you with the opportunity to develop expertise in the nursing care of people with chronic conditions and complex healthcare needs who experience medical and/or surgical interventions. Complexity of clinical presentations may be enhanced by individual genetic make-up and/or life experiences. The biophysical, pathophysiological, emotional and psychosocial capacities of people with chronic conditions indicate they may become more vulnerable to health and safety concerns and require planned nursing care to address these health complexities. You will plan comprehensive health assessments and nursing care, in partnership with people experiencing medical and/or surgical interventions and their families, to address their complex health needs.

Previous Student Feedback

Feedback, Recommendations and Responses

Every unit is reviewed for enhancement each year. At the most recent review, the following staff and student feedback items were identified and recommendations were made.

Feedback from SUTE data

Feedback

One student commented: Connected content to real life scenarios

Recommendation

Continue to incorporate evidence-based practice into nurses' nursing routines, for example; when discussing post-operative pain, connect the content to evidence-based pain protocols for pain management.
