## General Information

### Overview
This unit is designed to ensure you have the theoretical knowledge of food systems to work effectively as a nutritionist /dietitian. In this unit you will explore food service and food systems as critical drivers of individual, community, and population nutrition outcomes. You will critically analyse the complex challenges of food security, food waste, and environmental sustainability focusing on regional, rural, and remote contexts. You will synthesise knowledge of food legislation, regulations, and standards to develop, implement, and evaluate food supply chains. As an example of a food system, you will examine food service provision and management, taking into consideration menu planning, recipe standardisation, quality assurance, food safety, food legislation and business operations. In this unit you will also learn about local First Nations' food systems.
