OCCT13002 *Enabling Strategies in Neurological Rehabilitation*

Term 1 - 2027

Profile information current as at 07/09/2026 09:23 pm

All details in this unit profile for OCCT13002 have been officially approved by CQUniversity and represent a learning partnership between the University and you (our student). The information will not be changed unless absolutely necessary and any change will be clearly indicated by an approved correction included in the profile.

General Information

Overview

In this unit you will learn how to work with clients who experience neuromuscular, sensory, cognitive and perceptual impairments as a result of a wide variety of neurological problems. Using the occupational therapy practice process you will gather information about the lived experience of people with these conditions and explore the evidence based literature in order to investigate best practice for collaborative goal-setting, intervention planning, service delivery and evaluation. You will extend your knowledge of the aetiology, pathology, and prognosis of various neurological conditions experienced by occupational therapy clients across the lifespan and from acute care settings through to the community. A series of case studies including presentations from real clients will be used to scaffold your learning and you will be required to analyse and select appropriate contemporary occupational therapy practice models to guide your response to these complex case studies.

Previous Student Feedback

Feedback, Recommendations and Responses

Every unit is reviewed for enhancement each year. At the most recent review, the following staff and student feedback items were identified and recommendations were made.

Feedback from SUTE Feedback

Feedback

Two separate quizzes, rather than one single quiz, was appreciated by students.

Recommendation

It is recommended that a two-part in-class online quiz be retained, with Part A to be implemented approximately mid-term and Part B to be implemented at end of term.
