

OCHS13017 Resilient Organisations

Term 2 - 2021

Profile information current as at 01/05/2024 10:35 am

All details in this unit profile for OCHS13017 have been officially approved by CQUniversity and represent a learning partnership between the University and you (our student). The information will not be changed unless absolutely necessary and any change will be clearly indicated by an approved correction included in the profile.

General Information

Overview

In this unit you will consider some of the latest theories in the Safety Sciences, particularly in relation to the concept of resilience in organisations and broader organisational culture issues. The factors which influence the quality and validity of decision making within organisations, such as, values, mindfulness, culture, adaptive systems, participation and leadership in complex socio-technical systems will be considered. You will critically reflect on and evaluate theories such as resilience engineering, high reliability organisations, safety culture and safety climate, and discuss the usefulness of these theories to practice. You will also have the opportunity to evaluate the usefulness of the tools and methods available to measure and monitor factors that affect resilience and other safety science concepts within organisations.

Details

Career Level: *Undergraduate*

Unit Level: *Level 3*

Credit Points: 6

Student Contribution Band: 8

Fraction of Full-Time Student Load: 0.125

Pre-requisites or Co-requisites

Pre-requisite:- AINV11002

Important note: Students enrolled in a subsequent unit who failed their pre-requisite unit, should drop the subsequent unit before the census date or within 10 working days of Fail grade notification. Students who do not drop the unit in this timeframe cannot later drop the unit without academic and financial liability. See details in the [Assessment Policy and Procedure \(Higher Education Coursework\)](#).

Offerings For Term 2 - 2021

- Online

Attendance Requirements

All on-campus students are expected to attend scheduled classes – in some units, these classes are identified as a mandatory (pass/fail) component and attendance is compulsory. International students, on a student visa, must maintain a full time study load and meet both attendance and academic progress requirements in each study period (satisfactory attendance for International students is defined as maintaining at least an 80% attendance record).

Website

[This unit has a website, within the Moodle system, which is available two weeks before the start of term. It is important that you visit your Moodle site throughout the term. Please visit Moodle for more information.](#)

Class and Assessment Overview

Recommended Student Time Commitment

Each 6-credit Undergraduate unit at CQUniversity requires an overall time commitment of an average of 12.5 hours of study per week, making a total of 150 hours for the unit.

Class Timetable

[Regional Campuses](#)

Bundaberg, Cairns, Emerald, Gladstone, Mackay, Rockhampton, Townsville

[Metropolitan Campuses](#)

Assessment Overview

1. **Critical Review**

Weighting: 20%

2. **Written Assessment**

Weighting: 40%

3. **Literature Review or Systematic Review**

Weighting: 40%

Assessment Grading

This is a graded unit: your overall grade will be calculated from the marks or grades for each assessment task, based on the relative weightings shown in the table above. You must obtain an overall mark for the unit of at least 50%, or an overall grade of 'pass' in order to pass the unit. If any 'pass/fail' tasks are shown in the table above they must also be completed successfully ('pass' grade). You must also meet any minimum mark requirements specified for a particular assessment task, as detailed in the 'assessment task' section (note that in some instances, the minimum mark for a task may be greater than 50%). Consult the [University's Grades and Results Policy](#) for more details of interim results and final grades.

CQUniversity Policies

All University policies are available on the [CQUniversity Policy site](#).

You may wish to view these policies:

- Grades and Results Policy
- Assessment Policy and Procedure (Higher Education Coursework)
- Review of Grade Procedure
- Student Academic Integrity Policy and Procedure
- Monitoring Academic Progress (MAP) Policy and Procedure – Domestic Students
- Monitoring Academic Progress (MAP) Policy and Procedure – International Students
- Student Refund and Credit Balance Policy and Procedure
- Student Feedback – Compliments and Complaints Policy and Procedure
- Information and Communications Technology Acceptable Use Policy and Procedure

This list is not an exhaustive list of all University policies. The full list of University policies are available on the [CQUniversity Policy site](#).

Previous Student Feedback

Feedback, Recommendations and Responses

Every unit is reviewed for enhancement each year. At the most recent review, the following staff and student feedback items were identified and recommendations were made.

Feedback from Have Your Say Feedback

Feedback

More detail on critical reading and writing would be useful.

Recommendation

It is recommended that the critical reading and writing concepts required in this unit are more detailed across the term so that students get more insight on these key requirements.

Feedback from Have Your Say Feedback

Feedback

Students would like some clearer and better defined parameters for the assignment criteria.

Recommendation

It is recommended that the assessment tasks be better defined for students. It is intended to enhance the assessment items before the next offering to make sure that more detail is provided to students.

Unit Learning Outcomes

On successful completion of this unit, you will be able to:

1. Explore the characteristics of resilience in organisations.
2. Develop an ability to critically read and write on contemporary safety science theories from an evidence-informed advancing safety professional perspective.
3. Evaluate the theories that underpin resilience in organisations such as resilience engineering, safety culture and high reliability organisations and discuss the usefulness of these theories to practice.
4. Discern those factors which influence the quality and validity of decision making within organisations, such as, values, mindfulness, culture, adaptive systems, participation and leadership.
5. Compare controversial terms related to safety and culture and the ongoing debate underlying these precepts and relationships.
6. Evaluate the usefulness of the tools and methods available to measure and monitor contemporary safety science concepts such as organisational resilience potentials and safety culture/safety climate.

Nil at this time but congruent with the new Body of Knowledge released by the Australian OHS Education Board.

Assessment Tasks

1 Critical Reading - HRO Organisational Resilience Theory

Assessment Type

Critical Review

Task Description

This assessment item requires you to critically read, reflect and comment on the supplied readings and will form part of the skills you will learn as an emerging professional.

You will be asked to reflect on the theory and research on the notion of High Reliability Organisations (HROs) as a concept which inform organisational practices of safety, reliability and resilience.

You are therefore required to:-

(a) Convey your reflection on HRO theory including what you as a safety professional think of this resilience concept and why; (10%)

(b) Deliver your view points and opinion which demonstrates a critical reading of HRO's theory, through your referencing to the supplied readings or other literature (10%);

Your written piece will therefore consist of both reflection on the theory and critical reflection on the reading of the articles supplied (or sourced elsewhere) around this concept.

You must use correct Harvard style in-text referencing when referring to reading material and supply a reference list.

The assessment word limit is 1500 words.

Assessment Due Date

Week 5 Friday (13 Aug 2021) 11:45 pm AEST

Return Date to Students

Week 6 Friday (27 Aug 2021)

Weighting

20%

Assessment Criteria

The grading criteria are below:

- Conveys Reflection on High Reliability Organisational Theory (10%)
- Delivers view points or opinions based on the critical reading of the HRO material presented (10%)

Referencing Style

- [Harvard \(author-date\)](#)

Submission

Online

Learning Outcomes Assessed

- Explore the characteristics of resilience in organisations.
- Develop an ability to critically read and write on contemporary safety science theories from an evidence-informed advancing safety professional perspective.
- Evaluate the theories that underpin resilience in organisations such as resilience engineering, safety culture and

- high reliability organisations and discuss the usefulness of these theories to practice.
- Compare controversial terms related to safety and culture and the ongoing debate underlying these precepts and relationships.

Graduate Attributes

- Critical Thinking
- Information Literacy

2 Measuring Organisational Resilience - Report

Assessment Type

Written Assessment

Task Description

This assessment enables you to gain experience in reviewing and assessing survey tools used to measure organisational resilience.

In this unit you were presented with two organisational resilience survey tools, from which you are required to choose one for review.

You will choose either the **4 Potentials of Resilience Survey** (RE Theory) or the **5 Principles of Resilience Survey** (HRO/Organisational Resilience Theory) for your assignment.

You will then analyse and review the appropriateness of the survey's application in real-world practice.

You are required to prepare a report which:-

- Recognise the purpose of the survey and its relevance to measuring organisational resilience based on the theory which supports it i.e. RE theory or HRO/Organisational Resilience theory;
- Understand when and how the survey could be used in a real-world application;
- Evaluate how the meaning of any results obtained by the use of such surveys might inform strategic leadership decision making;
- Make recommendations on the use of the survey by discussing your own critical thinking on the usefulness (benefits and limitations) of the survey from a safety professional viewpoint, based on what you have discovered in your reading this term;
- Reference appropriate material to support your written arguments.

Your review of the literature to support your writing should include a minimum of 10 peer-reviewed journal articles and your review should be 1,500 words.

NB: You are NOT required to administer the survey within an organisation, this is purely a theoretical exercise.

Assessment Due Date

Week 8 Friday (10 Sept 2021) 11:45 pm AEST

Return Date to Students

Week 9 Friday (17 Sept 2021)

Weighting

40%

Assessment Criteria

- Recognise the purpose of the survey and its relevance to measuring organisational resilience (20%);
- Understand when and how the survey would be used in a real-world application (20%);
- Evaluate how the meaning of any results obtained by use of such survey might inform strategic leadership decision making (40%);
- Discuss your own critical thinking on the usefulness of the survey from a safety professional viewpoint, based on what you have discovered in your reading this term (15%); and
- Reference appropriate material to support your written arguments (5%).

A detailed assessment rubric will be provided in Moodle during the term.

3 Enhancing Organisational Resilience - Report

Assessment Type

Literature Review or Systematic Review

Task Description

Continuing with and building on your knowledge of your chosen topic from Assessment 2 (measuring HRO or RE), you are required to write a report in which you use critical reflection of the theories covered in this unit to understand how resilience might be enhanced in real-world practice.

Choose your topic from the two topics listed below on which to base the focus of your report. You are required to write a report which examines either:-

1. Strategic Leadership for Managing Organisational Resilience Potentials (RE Theory): Discuss your understanding of how leaders in organisations can enhance the 4 Resilience Potentials (Respond, Monitor, Learn and Anticipate), as proposed by Hollnagel's Safety II in Practice concepts; or
2. Strategic Leadership for Managing the Unexpected (HRO/Organisational Resilience Theory): Discuss your understanding of how leaders in organisations can enhance the 5 Principles of Resilience (Preoccupation with Failure, Reluctance to Simplify, Sensitivity to Operations, Commitment to Resilience, Deference to Expertise), as proposed by Weick and Sutcliffe (in your textbook) in relation to managing the unexpected.

You are also required to incorporate in your report recommendations on how organisations can enhance resilience based on your critical review of the theory from an evidence-based practice concept.

You are required to undertake self directed research on your chosen topic by reviewing the latest literature on the topic. Your literature review should include a minimum of 10 peer-reviewed journal articles and should be 2,000 words.

Assessment Due Date

Week 12 Friday (8 Oct 2021) 11:45 pm AEST

Return Date to Students

Exam Week Friday (22 Oct 2021)

Weighting

40%

Assessment Criteria

The grading criteria for the formal report are below:

- Provides a discussion and critical review of the theory under examination (HRO/Organisational Resilience or RE) using historical and current writing/research on the subject (30%).
- Provides a thorough examination on what the literature/research is saying on how leaders can enhance organisational resilience based on strategic leadership efforts (30%).
- Demonstrates the ability to make formal recommendations (incorporating your knowledge from Assessment 2) on how organisations should enhance organisational resilience. Use critical reading and thinking skills from a safety profession evidence-informed based practice perspective (30%).
- Uses correct Harvard style referencing and demonstration of advanced academic report writing (10%).

Academic Integrity Statement

As a CQUniversity student you are expected to act honestly in all aspects of your academic work.

Any assessable work undertaken or submitted for review or assessment must be your own work. Assessable work is any type of work you do to meet the assessment requirements in the unit, including draft work submitted for review and feedback and final work to be assessed.

When you use the ideas, words or data of others in your assessment, you must thoroughly and clearly acknowledge the source of this information by using the correct referencing style for your unit. Using others' work without proper acknowledgement may be considered a form of intellectual dishonesty.

Participating honestly, respectfully, responsibly, and fairly in your university study ensures the CQUniversity qualification you earn will be valued as a true indication of your individual academic achievement and will continue to receive the respect and recognition it deserves.

As a student, you are responsible for reading and following CQUniversity's policies, including the [Student Academic Integrity Policy and Procedure](#). This policy sets out CQUniversity's expectations of you to act with integrity, examples of academic integrity breaches to avoid, the processes used to address alleged breaches of academic integrity, and potential penalties.

What is a breach of academic integrity?

A breach of academic integrity includes but is not limited to plagiarism, self-plagiarism, collusion, cheating, contract cheating, and academic misconduct. The Student Academic Integrity Policy and Procedure defines what these terms mean and gives examples.

Why is academic integrity important?

A breach of academic integrity may result in one or more penalties, including suspension or even expulsion from the University. It can also have negative implications for student visas and future enrolment at CQUniversity or elsewhere. Students who engage in contract cheating also risk being blackmailed by contract cheating services.

Where can I get assistance?

For academic advice and guidance, the [Academic Learning Centre \(ALC\)](#) can support you in becoming confident in completing assessments with integrity and of high standard.

What can you do to act with integrity?

**Be Honest**

If your assessment task is done by someone else, it would be dishonest of you to claim it as your own

**Seek Help**

If you are not sure about how to cite or reference in essays, reports etc, then seek help from your lecturer, the library or the Academic Learning Centre (ALC)

**Produce Original Work**

Originality comes from your ability to read widely, think critically, and apply your gained knowledge to address a question or problem
