## 2 Reflective Essay

### Assessment Type

Reflective Practice Assignment

### Task Description

The second assessment task for this unit is a reflective essay. This is an individual assignment of approximately 2000 words and is based on your experience and impressions during the course of your study in the MPH. You must discuss and analyze what you have learned about public health and the role of the public health professional in a public health event or emergency. The focus of the assignment is to show your deepening understanding of public health practice and to consider your experiences in the larger context of community engagement. It is not enough to just describe what you did as part of your units or study; you must show that you have reflected on the experience and have tried to understand in the context of your own learning. Guidelines for the reflective assignment can be found at the end of the study guide.

This is a reflective assignment, so a more informal writing style is acceptable. However, the reflection must not be wholly descriptive. It must contain an assessment of the way in which your views or thinking has changed and what you have learned about yourself as a practitioner and the community in which you work.

You must achieve a mark of 50% on this assignment to pass the unit.

This assessment task is due by 11:59pm on Friday of week 11. Students' experiences and impressions will be discussed in class in week 12.

## Academic Integrity Statement

As a CQUniversity student you are expected to act honestly in all aspects of your academic work.

Any assessable work undertaken or submitted for review or assessment must be your own work. Assessable work is any type of work you do to meet the assessment requirements in the unit, including draft work submitted for review and feedback and final work to be assessed.

When you use the ideas, words or data of others in your assessment, you must thoroughly and clearly acknowledge the source of this information by using the correct referencing style for your unit. Using others' work without proper acknowledgement may be considered a form of intellectual dishonesty.

Participating honestly, respectfully, responsibly, and fairly in your university study ensures the CQUniversity qualification you earn will be valued as a true indication of your individual academic achievement and will continue to receive the respect and recognition it deserves.

As a student, you are responsible for reading and following CQUniversity's policies, including the [Student Academic Integrity Policy and Procedure](#). This policy sets out CQUniversity's expectations of you to act with integrity, examples of academic integrity breaches to avoid, the processes used to address alleged breaches of academic integrity, and potential penalties.

### What is a breach of academic integrity?

A breach of academic integrity includes but is not limited to plagiarism, self-plagiarism, collusion, cheating, contract cheating, and academic misconduct. The Student Academic Integrity Policy and Procedure defines what these terms mean and gives examples.

### Why is academic integrity important?

A breach of academic integrity may result in one or more penalties, including suspension or even expulsion from the University. It can also have negative implications for student visas and future enrolment at CQUniversity or elsewhere. Students who engage in contract cheating also risk being blackmailed by contract cheating services.

### Where can I get assistance?

For academic advice and guidance, the [Academic Learning Centre \(ALC\)](#) can support you in becoming confident in completing assessments with integrity and of high standard.

### What can you do to act with integrity?

#### Be Honest

If your assessment task is done by someone else, it would be dishonest of you to claim it as your own

#### Seek Help

If you are not sure about how to cite or reference in essays, reports etc, then seek help from your lecturer, the library or the Academic Learning Centre (ALC)

#### Produce Original Work

Originality comes from your ability to read widely, think critically, and apply your gained knowledge to address a question or problem
