General Information

Overview

How might we enable people to improve their health? Moving on from an individual focus towards a more systems-based approach requires innovation in health promotion. Human-centered design thinking (HCDT) is used in public health to embed innovation and shift inquiry towards an empowering process of solution-finding. The focus is on introducing you to the core functions of health promotion and innovation. In the first half of the term, you should be able to analyse how a HCDT lens impacts public health policy, supportive environments, and community action. In the second half of the term, you should be able to apply HCDT tools to identify problems and define solutions. You should emerge from this unit with the confidence to approach a diversity of public health challenges.
