The information will not be changed unless absolutely necessary and any change will be clearly indicated by an approved correction included in the profile.

General Information

Overview

In this unit, you will develop an understanding of paramedic care through the investigation of underpinning theory and practice of procedural applications in the discipline. This will include examples of clinical investigations of the neurological, respiratory, cardiovascular, gastrointestinal and endocrine systems including specific paramedic interventions such as cannulation, ventilation techniques, defibrillation and trauma management at an introductory level. Your knowledge and skills will be developed through a series of coursework exercises and practical laboratory sessions. The knowledge and skills developed in this unit ensure you meet the Paramedicine Board of Australia's registration requirements through a series of coursework exercises and practical laboratory sessions.
