Profile information current as at 22/11/2024 02:57 am

All details in this unit profile for PMSC12005 have been officially approved by CQUniversity and represent a learning partnership between the University and you (our student). The information will not be changed unless absolutely necessary and any change will be clearly indicated by an approved correction included in the profile.

General Information

Overview

In this unit, you will continue to develop your skills in recognising, diagnosing and managing patients presenting with complex and/or less commonly encountered acute and life-threatening disease processes, throughout the life span. You will integrate your developing knowledge of anatomy and physiology, pathophysiology and pharmacology with patient assessment, diagnostic evaluations and clinical history to formulate a provisional diagnosis. You will use this information to design and implement the most appropriate clinical management in line with contemporary industry guidelines and protocols, and emerging evidence-based practices, displaying safe, ethical and professional practice. Case-based learning combined with high fidelity simulation will contextualise your essential clinical skills, clinical decision making and problem-solving abilities.
