General Information

Overview

Traumatic injuries form a significant treatment burden on Australia's health care system and are a major cause of death and disability across all demographics. Within this unit, you will develop an understanding of traditional and emerging approaches to treating those suffering traumatic injuries within a prehospital specific context. The number of natural and man-made disasters has risen dramatically over the last decade. Natural disasters, industrial accidents, terrorist attacks and pandemics represent major incidents, often involving multiple casualties; therefore a component of this unit will include emergency management. Upon successful completion, you will have a comprehensive understanding of trauma management, multiple casualty scene management and emergency management within a prehospital context.
