General Information

Overview

This unit extends your clinical reasoning and decision-making skills in managing diverse patient presentations across acute, chronic, and palliative care contexts. You will integrate pathophysiological knowledge with comprehensive patient assessment to develop accurate diagnostic reasoning and safe, evidence-based practice. Teaching emphasises culturally safe, ethical, and patient-centred care that supports shared decision-making and upholds patient dignity, values, and autonomy. Clinical foci include chronic pain, endocrinology, bariatrics, toxicological presentations, and palliative and end-of-life care. Interprofessional education (IPE) is embedded throughout, with specialised nursing and allied health clinicians contributing expertise across key content areas, including interprofessional teamwork. IPE is further enriched through involvement of the patient perspective, deepening your knowledge of and capacity in collaborative, person-centred care.
