

PMSC20003 *Pharmacological Application in the Critical Care Setting*

Term 1 - 2023

Profile information current as at 23/04/2024 05:38 pm

All details in this unit profile for PMSC20003 have been officially approved by CQU University and represent a learning partnership between the University and you (our student). The information will not be changed unless absolutely necessary and any change will be clearly indicated by an approved correction included in the profile.

General Information

Overview

This unit will provide you with advanced knowledge of all aspects of clinical pharmacology to allow you to function safely within the current and emerging critical care context. You will acquire advanced theoretical knowledge and develop advanced clinical judgement for competent critical care pharmacology practice.

Details

Career Level: *Postgraduate*

Unit Level: *Level 8*

Credit Points: 6

Student Contribution Band: 8

Fraction of Full-Time Student Load: 0.125

Pre-requisites or Co-requisites

Co-requisites PMSC20001 Advanced Clinical Assessment and Decision Making

Important note: Students enrolled in a subsequent unit who failed their pre-requisite unit, should drop the subsequent unit before the census date or within 10 working days of Fail grade notification. Students who do not drop the unit in this timeframe cannot later drop the unit without academic and financial liability. See details in the [Assessment Policy and Procedure \(Higher Education Coursework\)](#).

Offerings For Term 1 - 2023

- Online

Attendance Requirements

All on-campus students are expected to attend scheduled classes - in some units, these classes are identified as a mandatory (pass/fail) component and attendance is compulsory. International students, on a student visa, must maintain a full time study load and meet both attendance and academic progress requirements in each study period (satisfactory attendance for International students is defined as maintaining at least an 80% attendance record).

Website

[This unit has a website, within the Moodle system, which is available two weeks before the start of term. It is important that you visit your Moodle site throughout the term. Please visit Moodle for more information.](#)

Class and Assessment Overview

Recommended Student Time Commitment

Each 6-credit Postgraduate unit at CQUniversity requires an overall time commitment of an average of 12.5 hours of study per week, making a total of 150 hours for the unit.

Class Timetable

[Regional Campuses](#)

Bundaberg, Cairns, Emerald, Gladstone, Mackay, Rockhampton, Townsville

[Metropolitan Campuses](#)

Adelaide, Brisbane, Melbourne, Perth, Sydney

Assessment Overview

1. **Presentation and Written Assessment**

Weighting: 40%

2. **Portfolio**

Weighting: 30%

3. **Online Test**

Weighting: 30%

Assessment Grading

This is a graded unit: your overall grade will be calculated from the marks or grades for each assessment task, based on the relative weightings shown in the table above. You must obtain an overall mark for the unit of at least 50%, or an overall grade of 'pass' in order to pass the unit. If any 'pass/fail' tasks are shown in the table above they must also be completed successfully ('pass' grade). You must also meet any minimum mark requirements specified for a particular assessment task, as detailed in the 'assessment task' section (note that in some instances, the minimum mark for a task may be greater than 50%). Consult the [University's Grades and Results Policy](#) for more details of interim results and final grades.

CQUniversity Policies

All University policies are available on the [CQUniversity Policy site](#).

You may wish to view these policies:

- Grades and Results Policy
- Assessment Policy and Procedure (Higher Education Coursework)
- Review of Grade Procedure
- Student Academic Integrity Policy and Procedure
- Monitoring Academic Progress (MAP) Policy and Procedure – Domestic Students
- Monitoring Academic Progress (MAP) Policy and Procedure – International Students
- Student Refund and Credit Balance Policy and Procedure
- Student Feedback – Compliments and Complaints Policy and Procedure
- Information and Communications Technology Acceptable Use Policy and Procedure

This list is not an exhaustive list of all University policies. The full list of University policies are available on the [CQUniversity Policy site](#).

Previous Student Feedback

Feedback, Recommendations and Responses

Every unit is reviewed for enhancement each year. At the most recent review, the following staff and student feedback items were identified and recommendations were made.

Feedback from Have your say

Feedback

A student expressed dislike for the lecture recording and the format being too long.

Recommendation

The pre-recorded lectures will be reviewed concerning format, content, and length. Resources provided for students within the unit will be reflected upon and improvements made to ensure a variety of learning styles continue to be accommodated.

Unit Learning Outcomes

On successful completion of this unit, you will be able to:

1. Describe the indications, actions, routes of administration, contraindications, side effects and precautions of medications and fluids administered at a critical care level, and how you would evaluate the effects of administration
2. Apply theoretical knowledge of pharmacokinetic and pharmacodynamic principles with regard to medications and fluids administered at a critical care level
3. Investigate and justify the most effective pharmacological treatment options within the critical care context
4. Communicate knowledge of clinical pharmacology, toxicology and toxinology within therapeutic relationships.

Alignment of Learning Outcomes, Assessment and Graduate Attributes

Alignment of Assessment Tasks to Learning Outcomes

Assessment Tasks

1 Presentation & Written Assessment

Assessment Type

Presentation and Written Assessment

Task Description

Pharmacology is forever evolving which results in health service providers consistently reviewing their drug therapy protocols to ensure that patient care is contemporary and evidence-based.

You are to select and research a drug that you believe would add value to your clinical practice that you do not currently have access to within your scope of practice. As part of your research, you are to determine the indications for this drug's use (including a brief background on the clinical conditions that you would use it for), the action of the drug, route/s of administration, contraindications, precautions, side effects, presentation and recommended dosing for adults, and if indicated, for paediatrics. You may include other pertinent yet concise information.

This assessment involves two parts.

Part one will require you to write a supporting document which must include a synopsis of the primary and supporting literature on the pharmacology you have selected. The word limit guide for this supporting document is approximately 2000 words (excluding references).

Your supporting document should include:

Introduction.

- Why you have selected the drug and clinical condition background/s.

Review of drug & synopsis of literature.

- Indications for the drug.
- Action/s of the drug.
- Routes of administration.
- Contraindications.
- Precautions.
- Side effects.
- Presentation.
- Recommended dosage (adult, and if indicated paediatric).
- Other pertinent information if required.

Recommendations for introducing this pharmacology.

Reference List.

Part two will require you to utilise the information collected in Part one to create a presentation in either an audio podcast (MP3 format only) or as a creative video (MP4 format only) aimed at your clinical peers.

Either the podcast or the creative video should be 5-7 minutes in length. If the audio podcast or the creative video is less than 4 minutes and 30 seconds you will be penalised at a rate of 5% per 15 seconds. On the other hand, information included after the 7-minute mark will not be reviewed and will not be marked as part of your presentation.

If you choose the podcast format:

The podcast must be styled as a typical audio podcast and include:

- An introduction.
- A logical presentation of your chosen topic.
- A closing section.

The introduction and the closing sections of the audio podcast are entirely up to you. Be creative!

If you choose the creative video format:

Your creative video can take many forms. It is entirely up to you how you produce this video. For example, you could create a talk show, a fire-side chat, or you may draw and explain the key areas you would like to present. It is however unacceptable to simply record your presentation e.g. a voiced powerpoint.

The creative video should include:

- An introduction.
- A logical presentation of your chosen topic.
- A closing section.

Assessment Due Date

Week 6 Friday (21 Apr 2023) 11:45 pm AEST

Return Date to Students

Week 8 Friday (5 May 2023)

Weighting

40%

Minimum mark or grade

50%

Assessment Criteria**Part One - The supporting document will be assessed on:**General presentation

- Organisation of supporting document.
- Writing mechanics.
- Word range.
- In-text referencing.
- Reference list.

Content

- Selected condition & pharmacology meets criteria; most current literature used.
- Introduction.
- Review of drug & synopsis of primary & supporting literature.
- Detailed pharmacological insight.
- Outline of recommendations.

Part Two - The presentation will be assessed on:Required content

- Main points covered.
- Content.

Presentation

- Audio/visual engagement.
- Use of audio/visual elements.
- Timing.
- Overall presentation.

This assessment is worth 40% of your overall unit mark. The rubric used in the marking of this assessment task can be found on the unit's Moodle page.

Referencing Style

- [Harvard \(author-date\)](#)

Submission

Online

Learning Outcomes Assessed

- Describe the indications, actions, routes of administration, contraindications, side effects and precautions of medications and fluids administered at a critical care level, and how you would evaluate the effects of administration
- Investigate and justify the most effective pharmacological treatment options within the critical care context
- Communicate knowledge of clinical pharmacology, toxicology and toxinology within therapeutic relationships.

Graduate Attributes

- Knowledge
- Communication
- Cognitive, technical and creative skills
- Research
- Self-management
- Ethical and Professional Responsibility

2 Portfolio

Assessment Type

Portfolio

Task Description

You will need to complete a clinical portfolio of two patient cases you have assessed and treated during your recent clinical work. The format of your portfolio can be self-determined; however, it **must** include:

- Introduce the case with a review of the patient presentation, including chief complaint, history, and physical examination.
- A review of the patient's own medications, including detail on each medication's indication, potential side-effects, and interactions, and how these medications may impact upon the patients' current condition and chief complaint.
- A summary of your non-pharmacological treatment of the patient.
- A detailed assessment of the actual pharmacology administered:
 - Core pharmacology used and why.
 - Impact on patient's presentation.
 - Potential interactions with patient medications.
- Discussion of actual or potential critical care pharmacological treatment of this patient, including:
 - Relating the drug/s mechanism of action to the patient's condition and associated pathophysiology (that is, why the drug is indicated).
 - Contraindications.
 - Potential side effects & explanation of why they occur.
 - Potential interactions with the patient's current medications.

You will need to convey your comprehensive understanding of the patient's own, core and critical care pharmacology. You will need to articulate insight into the complexities of pharmacology used in the delivery of care in the critical care context and give consideration to issues such as side-effects & interactions in the application of your clinical decision making. As such, selection of cases offering you the ability to demonstrate this knowledge is paramount.

Assessment Due Date

Week 10 Friday (19 May 2023) 11:45 pm AEST

Return Date to Students

Week 12 Friday (2 June 2023)

Weighting

30%

Minimum mark or grade

50%

Assessment Criteria

There is a 2000 word limit for each patient case (total of 4000 words, +/- 10%), it is therefore expected that each case presented will be concise.

General presentation

- Organisation of portfolio.
- Writing mechanics.
- Word range.
- In-text referencing.
- Reference list.

Content

- Introduces the case thoroughly.
- Thoroughness of review of patient medications.

- Summary of non-pharmacological treatment.
- Summary of actual pharmacology administered.
- Discussion of actual or potential critical care pharmacology.
- Summary of the case.

This portfolio is worth 30% of your overall unit mark. The portfolio will be assessed in accordance with the rubric provided on the unit's Moodle page.

- Ethical and Professional Responsibility

3 Online quiz

Assessment Type

Online Test

Task Description

You will be required to complete this online quiz by the end of Review Week, this quiz will become available in Week 12 and will have a specific time limit imposed to complete the quiz.

The quiz will consist of multiple-choice questions exploring content studied across the unit (Weeks 1-12) including lecture materials, online links & required readings. The quiz will assess your ability to identify & apply the foundations of critical care pharmacology including pharmacokinetics, pharmacodynamics, mechanism of action, indications, interactions, contraindications & side effects. In addition, some questions in the quiz will explore your ability to demonstrate clinical decision-making for the use of pharmacology in the critical care context. This is an individual assessment with no collaboration allowed.

Assessment Due Date

Review/Exam Week Friday (9 June 2023) 11:45 pm AEST

The quiz will open at 0800hrs on the Monday of Week 12 and close at 2345hrs AEST on the Friday of Review Week.

Return Date to Students

Review/Exam Week Friday (9 June 2023)

Weighting

30%

Minimum mark or grade

50%

Assessment Criteria

You will be required to answer each question correctly to receive the full marks allocated to that question. Non-attempts will score a zero mark. This quiz is worth 30% of your overall unit mark. This assessment task must be completed by 2345hrs on the Friday of Review Week. In the absence of an approved extension, there will be no opportunity to complete the task after this date, and there will be no opportunity to apply a late penalty of five percent per day.

Academic Integrity Statement

As a CQUniversity student you are expected to act honestly in all aspects of your academic work.

Any assessable work undertaken or submitted for review or assessment must be your own work. Assessable work is any type of work you do to meet the assessment requirements in the unit, including draft work submitted for review and feedback and final work to be assessed.

When you use the ideas, words or data of others in your assessment, you must thoroughly and clearly acknowledge the source of this information by using the correct referencing style for your unit. Using others' work without proper acknowledgement may be considered a form of intellectual dishonesty.

Participating honestly, respectfully, responsibly, and fairly in your university study ensures the CQUniversity qualification you earn will be valued as a true indication of your individual academic achievement and will continue to receive the respect and recognition it deserves.

As a student, you are responsible for reading and following CQUniversity's policies, including the [Student Academic Integrity Policy and Procedure](#). This policy sets out CQUniversity's expectations of you to act with integrity, examples of academic integrity breaches to avoid, the processes used to address alleged breaches of academic integrity, and potential penalties.

What is a breach of academic integrity?

A breach of academic integrity includes but is not limited to plagiarism, self-plagiarism, collusion, cheating, contract cheating, and academic misconduct. The Student Academic Integrity Policy and Procedure defines what these terms mean and gives examples.

Why is academic integrity important?

A breach of academic integrity may result in one or more penalties, including suspension or even expulsion from the University. It can also have negative implications for student visas and future enrolment at CQUniversity or elsewhere. Students who engage in contract cheating also risk being blackmailed by contract cheating services.

Where can I get assistance?

For academic advice and guidance, the [Academic Learning Centre \(ALC\)](#) can support you in becoming confident in completing assessments with integrity and of high standard.

What can you do to act with integrity?

Be Honest

If your assessment task is done by someone else, it would be dishonest of you to claim it as your own

Seek Help

If you are not sure about how to cite or reference in essays, reports etc, then seek help from your lecturer, the library or the Academic Learning Centre (ALC)

Produce Original Work

Originality comes from your ability to read widely, think critically, and apply your gained knowledge to address a question or problem
