General Information

Overview

On completion of this unit you will be able to articulate the relationship between medical conditions, pathophysiology, clinical assessment findings and management in the critical care context. You will be able to advocate for the appropriate use of clinical measurement assessments, demonstrate analysis, and interpret abnormal results with regard to underlying pathophysiology. You will also employ evidence-based knowledge and practice in the management of patients, incorporating the use of clinical problem solving and decision making.

Attendance Requirements

All on-campus students are expected to attend scheduled classes – in some units, these classes are identified as a mandatory (pass/fail) component and attendance is compulsory. International students, on a student visa, must maintain a full time study load and meet both attendance and academic progress requirements in each study period (satisfactory attendance for International students is defined as maintaining at least an 80% attendance record).

Previous Student Feedback

Feedback, Recommendations and Responses

Every unit is reviewed for enhancement each year. At the most recent review, the following staff and student feedback items were identified and recommendations were made.

Feedback from SUTE

Feedback

Recorded powerpoints are not engaging.

Recommendation

The PowerPoints are recorded reasonably verbatim, and the PowerPoint slides are also uploaded separately to accommodate different student learning needs. This is explained in the introduction to the unit. A variety of other resources, such as study guides, are also provided in the unit. Nonetheless, the recording of PowerPoints will be reflected upon and reviewed.

Feedback from SUTE

Feedback

The date format provided for assessments is, for example, 'Friday of Week 10'. Actual dates would be helpful.

Recommendation

Review and add further detail to assessment due dates.
