

PMSC20007 Aeromedical, Retrieval and Tactical Medicine

Term 1 - 2018

Profile information current as at 27/04/2024 08:53 pm

All details in this unit profile for PMSC20007 have been officially approved by CQUUniversity and represent a learning partnership between the University and you (our student). The information will not be changed unless absolutely necessary and any change will be clearly indicated by an approved correction included in the profile.

General Information

Overview

This unit will give you the specific knowledge and skills to function in aeromedical, retrieval and tactical medicine areas as a critical care paramedic. The unit looks at the core aspects of aeromedical and retrieval medicine covering physics, planning and preparing strategies for successful operations within aeromedical, retrieval and tactical areas, rotary vs fixed wing transport, functioning in confined or limited spaces, human factors and operational concerns, the clinical issues, risks and challenges involved in transporting critically ill patients in the aeromedical environments. You will demonstrate an understanding of the concepts regarding risk analysis, safety concerns, teamwork and identify the effective communication and collaboration skills utilised within aeromedical, retrieval and tactical environments.

Details

Career Level: *Postgraduate*

Unit Level: *Level 8*

Credit Points: 6

Student Contribution Band: 8

Fraction of Full-Time Student Load: 0.125

Pre-requisites or Co-requisites

There are no requisites for this unit.

Important note: Students enrolled in a subsequent unit who failed their pre-requisite unit, should drop the subsequent unit before the census date or within 10 working days of Fail grade notification. Students who do not drop the unit in this timeframe cannot later drop the unit without academic and financial liability. See details in the [Assessment Policy and Procedure \(Higher Education Coursework\)](#).

Offerings For Term 1 - 2018

- Distance

Attendance Requirements

All on-campus students are expected to attend scheduled classes – in some units, these classes are identified as a mandatory (pass/fail) component and attendance is compulsory. International students, on a student visa, must maintain a full time study load and meet both attendance and academic progress requirements in each study period (satisfactory attendance for International students is defined as maintaining at least an 80% attendance record).

Website

[This unit has a website, within the Moodle system, which is available two weeks before the start of term. It is important that you visit your Moodle site throughout the term. Please visit Moodle for more information.](#)

Class and Assessment Overview

Recommended Student Time Commitment

Each 6-credit Postgraduate unit at CQUniversity requires an overall time commitment of an average of 12.5 hours of study per week, making a total of 150 hours for the unit.

2. **Written Assessment**

Weighting: 30%

3. **Portfolio**

Weighting: 40%

Assessment Grading

This is a graded unit: your overall grade will be calculated from the marks or grades for each assessment task, based on the relative weightings shown in the table above. You must obtain an overall mark for the unit of at least 50%, or an overall grade of 'pass' in order to pass the unit. If any 'pass/fail' tasks are shown in the table above they must also be completed successfully ('pass' grade). You must also meet any minimum mark requirements specified for a particular assessment task, as detailed in the 'assessment task' section (note that in some instances, the minimum mark for a task may be greater than 50%). Consult the [University's Grades and Results Policy](#) for more details of interim results and final grades.

CQUniversity Policies

All University policies are available on the [CQUniversity Policy site](#).

You may wish to view these policies:

- Grades and Results Policy
- Assessment Policy and Procedure (Higher Education Coursework)
- Review of Grade Procedure
- Student Academic Integrity Policy and Procedure
- Monitoring Academic Progress (MAP) Policy and Procedure – Domestic Students
- Monitoring Academic Progress (MAP) Policy and Procedure – International Students
- Student Refund and Credit Balance Policy and Procedure
- Student Feedback – Compliments and Complaints Policy and Procedure
- Information and Communications Technology Acceptable Use Policy and Procedure

This list is not an exhaustive list of all University policies. The full list of University policies are available on the [CQUniversity Policy site](#).

Previous Student Feedback

Feedback, Recommendations and Responses

Every unit is reviewed for enhancement each year. At the most recent review, the following staff and student feedback items were identified and recommendations were made.

Feedback from Informal feedback from students.

Feedback

The students enjoyed the opportunity to visit Aeromedical Bases as part of the Portfolio Assessment Task.

Recommendation

This practice will continue to ensure authentic learning experiences within this area of expertise.

Feedback from Self Reflection

Feedback

The introduction of separate recordings on each assessment task and their marking rubrics has assisted in the improvement of the students overall results.

Recommendation

This practice will continue as it appears to be beneficial to the students.

Unit Learning Outcomes

On successful completion of this unit, you will be able to:

1. Plan, prepare and implement strategies for successful operation within aeromedical, retrieval or tactical areas
2. Integrate critical care clinical knowledge and functionality in aeromedical, retrieval and tactical operations
3. Identify effective communication and collaborative skills utilised within aeromedical, retrieval and tactical environments
4. Examine the clinical issues, risks and challenges involved in the transporting critically ill patients in the aeromedical environment
5. Demonstrate an understanding of the concepts of risk analysis, team safety and teamwork in aeromedical, retrieval and tactical environment.

A Graduate Diploma is now the standard requirement for many state ambulance services for advanced positions in the paramedic field. These positions have speciality areas that include aeromedical, retrieval and tactical areas.

Assessment Tasks

1 Presentation

Assessment Type

Presentation

Task Description

In this assessment you will need to create a PowerPoint case presentation describing a particular aeromedical, retrieval, or tactical agency that employs paramedics. It is not limited to Australia (or your local service) and can be any entity across the globe that has a role in paramedic driven aeromedical, retrieval, or tactical medicine.

The PowerPoint presentation must include the following information:

- History of the service.
- Capabilities and Limitations of the service.
- A description of the communications and collaboration skills utilized by this service and the clinical skills, training and knowledge of the paramedics involved.
- Clinical issues, risks and challenges involved including, but not limited to:
 - Types of patients transported or treated in the field
 - Specific safety issues faced by the paramedic, team or service
 - Potential law or administration concerns (such as accreditation, international or state boundaries, etc.)
 - Health and fitness requirements of the personnel.

Assessment Due Date

Week 6 Wednesday (18 Apr 2018) 12:00 pm AEST

Return Date to Students

Week 8 Thursday (3 May 2018)

Weighting

30%

Minimum mark or grade

50

Assessment Criteria

The presentation will be assessed in accordance with the rubric and information provided on the unit's Moodle page. The following criteria are key points to be included:

- The presentation should be in a PowerPoint format.
- Recorded narration is required and you can use the Notes section to detail your thinking.
- The presentation must address each of the main topic tasks as detailed in the task description.
- Avoid superficial points or comments.
- As this is a presentation, you should include images where appropriate, but these must be referenced.

The presentation has no specified length in regards to the amount of slides used but the recorded presentation should be maximum of twenty (20) minutes and a minimum of fifteen (15) minutes in length.

This presentation is worth 30% of your overall unit mark.

Submission

Online

Learning Outcomes Assessed

- Integrate critical care clinical knowledge and functionality in aeromedical, retrieval and tactical operations
- Identify effective communication and collaborative skills utilised within aeromedical, retrieval and tactical environments
- Examine the clinical issues, risks and challenges involved in the transporting critically ill patients in the aeromedical environment
- Demonstrate an understanding of the concepts of risk analysis, team safety and teamwork in aeromedical, retrieval and tactical environment.

Graduate Attributes

- Knowledge
- Cognitive, technical and creative skills
- Research
- Self-management
- Ethical and Professional Responsibility

2 Case Report - Risk Analysis

Assessment Type

Written Assessment

Task Description

In this assessment you will be given a case briefing for an aeromedical scenario. From there, you will create a risk analysis for the successful retrieval and transport of the patient in the scenario. You are required to explain the risks associated with this patient management and retrieval and if/how these risks can be mitigated by addressing the following main points:

- Potential issues or hazards regarding the mission (i.e. distance, weather, personnel needed, equipment checks, etc.)
- Potential clinical issues, risks and challenges associated with transporting this patient (i.e. stability, deterioration, physics, health concerns, stressors, etc.)

You are also required to take into account: preparation, communication and planning, crew resource management, flight physiology, and in-flight emergencies.

Assessment Due Date

Week 9 Wednesday (9 May 2018) 12:00 pm AEST

Return Date to Students

Week 11 Thursday (24 May 2018)

Weighting

30%

Minimum mark or grade

50

Assessment Criteria

There is minimum word limit of 2000 words for your risk analysis case report. It is expected that the report will be clear and concise. The case report will be assessed in accordance with the information and rubric provided on the unit's Moodle page. It should be presented in an essay format.

The case report document is worth 30% of your overall unit mark.

Referencing Style

Learning Outcomes Assessed

- Plan, prepare and implement strategies for successful operation within aeromedical, retrieval or tactical areas
- Integrate critical care clinical knowledge and functionality in aeromedical, retrieval and tactical operations
- Examine the clinical issues, risks and challenges involved in the transporting critically ill patients in the aeromedical environment
- Demonstrate an understanding of the concepts of risk analysis, team safety and teamwork in aeromedical, retrieval and tactical environment.

Graduate Attributes

- Knowledge
- Cognitive, technical and creative skills
- Research
- Self-management

3 Portfolio

Assessment Type

Portfolio

Task Description

This assessment requires two tasks.

Firstly, you are required to arrange an observation site visit or tour to any of the following areas:

- Any paramedic based aeromedical unit including EMQ, NSW HEMS, RACQ, MedStar, etc.
- Any fixed wing service such as a RFDS unit
- Any police service that supports paramedics, has an aeromedical or medical unit, or has a tactical unit

Others may be accepted, but will need to be approved by Unit Coordinator prior to commencement.

Please take note that the site visit is not designed to be formal placements or ride-alongs with QAS, NSW Ambulance or any other ambulance service, aeromedical or tactical entity. The goal of this site visit is for you to directly observe and reflect upon critical care paramedics in one of our specialty areas.

Secondly, you will need to critically discuss the following items in relation to service that you visited:

- Role and responsibilities of the CCPs (or other advanced practice clinician) involved.
- The CCP's unique role in the aeromedical, retrieval or tactical environment (i.e. rescue trained, additional skills, experience or other qualifications required, combat trained, etc.).
- The other personnel involved and how they collaborate, communicate and function with the CCP (or other advanced practice clinician).
- The transport units involved (i.e. described the rotatory or fixed wing craft or tactical vehicle used) and their considerations such as capabilities, range (distance able to travel), operating space, maximum occupancy, landing requirements, noise, pressurization, etc.
- Specialty equipment used (i.e. medical devices, retrieval equipment, point of care devices, etc.)
- Dispatch and TeleHealth (consultation) capabilities

Assessment Due Date

Week 12 Wednesday (30 May 2018) 12:00 pm AEST

Return Date to Students

Exam Week Thursday (14 June 2018)

Weighting

40%

Minimum mark or grade

50

Assessment Criteria

While there is no maximum word limit for your portfolio, there is a minimum word count of 2000 words. The portfolio will be assessed in accordance with the rubric and information provided on the unit's Moodle page. Your portfolio should be presented in an essay format.

This portfolio is worth 40% of your overall unit mark.

Academic Integrity Statement

As a CQUniversity student you are expected to act honestly in all aspects of your academic work.

Any assessable work undertaken or submitted for review or assessment must be your own work. Assessable work is any type of work you do to meet the assessment requirements in the unit, including draft work submitted for review and feedback and final work to be assessed.

When you use the ideas, words or data of others in your assessment, you must thoroughly and clearly acknowledge the source of this information by using the correct referencing style for your unit. Using others' work without proper acknowledgement may be considered a form of intellectual dishonesty.

Participating honestly, respectfully, responsibly, and fairly in your university study ensures the CQUniversity qualification you earn will be valued as a true indication of your individual academic achievement and will continue to receive the respect and recognition it deserves.

As a student, you are responsible for reading and following CQUniversity's policies, including the [Student Academic Integrity Policy and Procedure](#). This policy sets out CQUniversity's expectations of you to act with integrity, examples of academic integrity breaches to avoid, the processes used to address alleged breaches of academic integrity, and potential penalties.

What is a breach of academic integrity?

A breach of academic integrity includes but is not limited to plagiarism, self-plagiarism, collusion, cheating, contract cheating, and academic misconduct. The Student Academic Integrity Policy and Procedure defines what these terms mean and gives examples.

Why is academic integrity important?

A breach of academic integrity may result in one or more penalties, including suspension or even expulsion from the University. It can also have negative implications for student visas and future enrolment at CQUniversity or elsewhere. Students who engage in contract cheating also risk being blackmailed by contract cheating services.

Where can I get assistance?

For academic advice and guidance, the [Academic Learning Centre \(ALC\)](#) can support you in becoming confident in completing assessments with integrity and of high standard.

What can you do to act with integrity?

Be Honest

If your assessment task is done by someone else, it would be dishonest of you to claim it as your own

Seek Help

If you are not sure about how to cite or reference in essays, reports etc, then seek help from your lecturer, the library or the Academic Learning Centre (ALC)

Produce Original Work

Originality comes from your ability to read widely, think critically, and apply your gained knowledge to address a question or problem
