PMSC20016 *Direct Threat Care*

Term 1 - 2027

Profile information current as at 07/09/2026 09:28 pm

All details in this unit profile for PMSC20016 have been officially approved by CQUniversity and represent a learning partnership between the University and you (our student). The information will not be changed unless absolutely necessary and any change will be clearly indicated by an approved correction included in the profile.

General Information

Overview

This unit will introduce and familiarise you with the risks associated with conducting patient care in the direct threat environment. Wounding patterns such as blunt and penetrating trauma, blast injuries and ballistics will be discussed in depth. You will be introduced to the concepts of situational awareness and critical thinking as it applies to treatment priorities. Specialist equipment not available in mainstream pre-hospital medicine will be introduced to assist you with environment-specific treatment methodologies for major preventable causes of death. You will synthesise direct-threat related risks with treatment priorities to manage the tension between risk mitigation and favourable patient outcomes.
