

PMSC20017 *Indirect Threat Care*

Term 1 - 2019

Profile information current as at 12/05/2024 09:11 am

All details in this unit profile for PMSC20017 have been officially approved by CQUUniversity and represent a learning partnership between the University and you (our student). The information will not be changed unless absolutely necessary and any change will be clearly indicated by an approved correction included in the profile.

General Information

Overview

In this unit, you will be introduced to the indirect threat care environment, which signals a shift through risk de-escalation from basic life support to advanced life support treatment methods. You will further your knowledge of the comprehensive trauma assessment of patients, combining the skills of clinical history taking with those of physical examination using a trauma focused primary survey. In addition, you will undertake a review of clinical findings and incorporate differential diagnosis to implement an appropriate treatment plan in preparation for evacuation. Risk mitigation and situational awareness techniques will be added to the clinical assessment to ensure a measured situational response in the event of threat re-escalation.

Details

Career Level: *Postgraduate*

Unit Level: *Level 8*

Credit Points: 6

Student Contribution Band: 8

Fraction of Full-Time Student Load: 0.125

Pre-requisites or Co-requisites

There are no requisites for this unit.

Important note: Students enrolled in a subsequent unit who failed their pre-requisite unit, should drop the subsequent unit before the census date or within 10 working days of Fail grade notification. Students who do not drop the unit in this timeframe cannot later drop the unit without academic and financial liability. See details in the [Assessment Policy and Procedure \(Higher Education Coursework\)](#).

Offerings For Term 1 - 2019

- Online

Attendance Requirements

All on-campus students are expected to attend scheduled classes – in some units, these classes are identified as a mandatory (pass/fail) component and attendance is compulsory. International students, on a student visa, must maintain a full time study load and meet both attendance and academic progress requirements in each study period (satisfactory attendance for International students is defined as maintaining at least an 80% attendance record).

Website

[This unit has a website, within the Moodle system, which is available two weeks before the start of term. It is important that you visit your Moodle site throughout the term. Please visit Moodle for more information.](#)

Class and Assessment Overview

Recommended Student Time Commitment

Each 6-credit Postgraduate unit at CQUniversity requires an overall time commitment of an average of 12.5 hours of study per week, making a total of 150 hours for the unit.

Assessment Overview

1. **Case Study**

Weighting: 35%

2. **Case Study**

Weighting: 35%

3. **Written Assessment**

Weighting: 30%

Assessment Grading

This is a graded unit: your overall grade will be calculated from the marks or grades for each assessment task, based on the relative weightings shown in the table above. You must obtain an overall mark for the unit of at least 50%, or an overall grade of 'pass' in order to pass the unit. If any 'pass/fail' tasks are shown in the table above they must also be completed successfully ('pass' grade). You must also meet any minimum mark requirements specified for a particular assessment task, as detailed in the 'assessment task' section (note that in some instances, the minimum mark for a task may be greater than 50%). Consult the [University's Grades and Results Policy](#) for more details of interim results and final grades.

CQUniversity Policies

All University policies are available on the [CQUniversity Policy site](#).

You may wish to view these policies:

- Grades and Results Policy
- Assessment Policy and Procedure (Higher Education Coursework)
- Review of Grade Procedure
- Student Academic Integrity Policy and Procedure
- Monitoring Academic Progress (MAP) Policy and Procedure – Domestic Students
- Monitoring Academic Progress (MAP) Policy and Procedure – International Students
- Student Refund and Credit Balance Policy and Procedure
- Student Feedback – Compliments and Complaints Policy and Procedure
- Information and Communications Technology Acceptable Use Policy and Procedure

This list is not an exhaustive list of all University policies. The full list of University policies are available on the [CQUniversity Policy site](#).

Unit Learning Outcomes

On successful completion of this unit, you will be able to:

1. Formulate a comprehensive tactical primary survey including a clinical assessment of physiological systems
2. Synthesise data obtained from clinical assessments to construct treatment plans that address and prioritise the major causes of trauma death at an advanced life support level
3. Discuss the importance of assessing and maintaining operational control and managing patient movement during threat re-escalation.

Alignment of Learning Outcomes, Assessment and Graduate Attributes

Textbooks and Resources

Textbooks

There are no required textbooks.

Additional Textbook Information

Students should already have an understanding of Emergency and Trauma Care. However, should students wish to have a reference for this course Emergency and Trauma Care 2e for Nurses and Paramedics, Kurtis and Ramsden is recommended. Other texts will be provided online through the CQUni library. Student will have online access to Ciotto's Disaster Medicine and the Journal of Special Operations (JSOM) **Tactical Paramedic Protocols** (ATP-P) Handbook.

IT Resources

You will need access to the following IT resources:

- CQUniversity Student Email
- Internet
- Unit Website (Moodle)

Referencing Style

All submissions for this unit must use the referencing style: [Harvard \(author-date\)](#)
For further information, see the Assessment Tasks.

Schedule

Week 1 Triage - 11 Mar 2019

Module/Topic	Chapter	Events and Submissions/Topic
Triage HX. Tactical triage. Triage in dynamic events. Systems of care. Casualty Clearing Stations. Use of advanced practitioners and physicians.		

Week 2 Massive haemorrhage control - 18 Mar 2019

Module/Topic	Chapter	Events and Submissions/Topic
Junctional haemorrhage. Wound packing. Junctional tourniquets. Innovative junctional haemorrhage control. Introduction to REBOA.		

Week 3 Airway control - 25 Mar 2019

Module/Topic	Chapter	Events and Submissions/Topic
Airway anatomy and physiology. Basic manoeuvres and positioning. Basic adjuncts. Intermediate adjuncts. Advanced airway control. Surgical airway.		

Week 4 Respiratory - 01 Apr 2019

Module/Topic	Chapter	Events and Submissions/Topic
Anatomy and physiology. Closed/open/tension pneumothorax and other lung pathologies. Ventilation. Basic mechanical ventilation.		

Week 5 damage control resuscitation 1 - 08 Apr 2019

Module/Topic	Chapter	Events and Submissions/Topic
Bleeding control. IV IO. Fluid Resuscitation. TQ assessment and de-escalation.		

Vacation Week - 15 Apr 2019

Module/Topic	Chapter	Events and Submissions/Topic
--------------	---------	------------------------------

Week 6 Heat/Head - 22 Apr 2019

Module/Topic	Chapter	Events and Submissions/Topic
Patient warming options. Head injuries. Cerebral perfusion pressure. Mean arterial pressure.		

Week 7 Pharmacology 1 - 29 Apr 2019

Module/Topic	Chapter	Events and Submissions/Topic
Pharmacology terms. Trauma-specific medications. Triple option pain management.		Tactical primary survey-Case study Due: Week 7 Monday (29 Apr 2019) 12:00 am AEST

Week 8 Pharmacology 2 - 06 May 2019

Module/Topic	Chapter	Events and Submissions/Topic
Antibiotics.		Fluid Therapy- Case study Due: Week 8 Monday (6 May 2019) 12:00 am AEST

Week 9 Environment 1 - 13 May 2019

Module/Topic	Chapter	Events and Submissions/Topic
--------------	---------	------------------------------

Extremity fractures.
Pelvic fractures.
Splinting.
Traction splinting.
Other fractures.

Week 10 environment 2 - 20 May 2019

Module/Topic	Chapter	Events and Submissions/Topic
Burns. Burns Pathophysiology. Burns resuscitation.		

Week 11 Traumatic resuscitation - 27 May 2019

Module/Topic	Chapter	Events and Submissions/Topic
Evidence review of traumatic resuscitation.		Patient movement Due: Week 11 Monday (27 May 2019) 11:45 pm AEST

Week 12 Environment 3 - 03 Jun 2019

Module/Topic	Chapter	Events and Submissions/Topic
Review of TECC ITC. Penetrating eye trauma.		

Review/Exam Week - 10 Jun 2019

Module/Topic	Chapter	Events and Submissions/Topic
--------------	---------	------------------------------

Exam Week - 17 Jun 2019

Module/Topic	Chapter	Events and Submissions/Topic
--------------	---------	------------------------------

Assessment Tasks

1 Tactical primary survey-Case study

Assessment Type

Case Study

Task Description

In the tactical medical context, you will approach the primary survey differently to the traditional EMS primary survey. This approach is based on our understanding of the preventable causes of death in the tactical context. You will be provided with a clinical case as a catalyst to reflect on the differences between the standard primary survey and a tactical primary survey. You must rationalise the differences by referring to the current evidence related to preventable causes of death and the inherent risk of conducting medical treatment in a threat-potential environment.

Your case study must include the following information

- Tabulate the differences between a tactical primary survey and a standardised EMS primary survey.
- Discuss your plan for the most appropriate treatment for your patient using the skills matrix within the framework of the tactical primary survey.
- Rationalise your decisions to defer or prioritise treatments based on the context of the indirect threat care environment and the flow of a tactical medical case.
- Rationalise your recommended interventions using the best current evidence for the tactical primary survey.

Assessment Due Date

Week 7 Monday (29 Apr 2019) 12:00 am AEST

Return Date to Students

Week 9 Monday (13 May 2019)

Weighting

35%

Minimum mark or grade

50%

Assessment Criteria

There is a minimum word count of 2000 words excluding references for your assessment. Your case study will be clear and concise. The case study will be assessed in accordance with the information and rubric provided on the units Moodle page. It should be presented in an essay format.

The case study is worth 35% of your overall unit mark.

Referencing Style

- [Harvard \(author-date\)](#)

Submission

Online

Learning Outcomes Assessed

- Formulate a comprehensive tactical primary survey including a clinical assessment of physiological systems

Graduate Attributes

- Knowledge
- Communication
- Cognitive, technical and creative skills

2 Fluid Therapy- Case study

Assessment Type

Case Study

Task Description

There are currently few “fluid” choices for patients who have suffered major trauma and who are being treated by paramedics from a civilian sector EMS system. You will be given a list of patients with varying trauma pathologies and you must choose the optimal fluid resuscitation strategy for each pathology based on the current best evidence within the tactical medical context. You must provide the rationale for your choice based on the best available evidence. You must also consider the environmental and logistical aspects of carrying and administering your fluids of choice and describe how you will allocate and distribute fluid resources in a hypothetical team setting. You are not limited in your exploration of fluid choices by any clinical practice guidelines and you are encouraged to explore and consider fluids that are not in your current scope of practice.

Your case study report must include:

- Tabulate the pros and cons of different fluids based on the best current evidence.
- Discuss your logistical and allocation plan.
- Rationalise your fluid choices based on the presenting pathologies of each case.

Assessment Due Date

Week 8 Monday (6 May 2019) 12:00 am AEST

Return Date to Students

Week 10 Monday (20 May 2019)

Weighting

35%

Minimum mark or grade

50%

Assessment Criteria

There is a minimum word count of 2000 words excluding references for your assessment. Your case study will be clear and concise. The case study will be assessed in accordance with the information and rubric provided on the units Moodle page. It should be presented in an essay format.

The case study is worth 35% of your overall unit mark.

Learning Outcomes Assessed

- Formulate a comprehensive tactical primary survey including a clinical assessment of physiological systems
- Synthesise data obtained from clinical assessments to construct treatment plans that address and prioritise the major causes of trauma death at an advanced life support level
- Discuss the importance of assessing and maintaining operational control and managing patient movement during threat re-escalation.

Graduate Attributes

- Knowledge
- Communication
- Cognitive, technical and creative skills
- Ethical and Professional Responsibility

3 Patient movement

Assessment Type

Written Assessment

Task Description

Spinal immobilisation is practised as routine by paramedics in the civilian context. Discuss the current evidence and describe how it supports or refutes the need for aggressive spinal immobilisation in tactical contexts. Your discussion must be supported by the best evidence currently available on the topic of spinal immobilisation in the tactical environment.

Your report must include:

- Critically appraise the evidence for or against spinal immobilisation in tactical contexts.
- In relation to C-TECC and CoTCCC guidelines, discuss current recommendations for spinal immobilisation in tactical contexts.
- Consider the evidence and guidelines and discuss how you would balance the tension between medicine and tactics in a threat-potentiating environment.

Assessment Due Date

Week 11 Monday (27 May 2019) 11:45 pm AEST

Return Date to Students

Review/Exam Week Monday (10 June 2019)

Academic Integrity Statement

As a CQUniversity student you are expected to act honestly in all aspects of your academic work.

Any assessable work undertaken or submitted for review or assessment must be your own work. Assessable work is any type of work you do to meet the assessment requirements in the unit, including draft work submitted for review and feedback and final work to be assessed.

When you use the ideas, words or data of others in your assessment, you must thoroughly and clearly acknowledge the source of this information by using the correct referencing style for your unit. Using others' work without proper acknowledgement may be considered a form of intellectual dishonesty.

Participating honestly, respectfully, responsibly, and fairly in your university study ensures the CQUniversity qualification you earn will be valued as a true indication of your individual academic achievement and will continue to receive the respect and recognition it deserves.

As a student, you are responsible for reading and following CQUniversity's policies, including the [Student Academic Integrity Policy and Procedure](#). This policy sets out CQUniversity's expectations of you to act with integrity, examples of academic integrity breaches to avoid, the processes used to address alleged breaches of academic integrity, and potential penalties.

What is a breach of academic integrity?

A breach of academic integrity includes but is not limited to plagiarism, self-plagiarism, collusion, cheating, contract cheating, and academic misconduct. The Student Academic Integrity Policy and Procedure defines what these terms mean and gives examples.

Why is academic integrity important?

A breach of academic integrity may result in one or more penalties, including suspension or even expulsion from the University. It can also have negative implications for student visas and future enrolment at CQUniversity or elsewhere. Students who engage in contract cheating also risk being blackmailed by contract cheating services.

Where can I get assistance?

For academic advice and guidance, the [Academic Learning Centre \(ALC\)](#) can support you in becoming confident in completing assessments with integrity and of high standard.

What can you do to act with integrity?

Be Honest

If your assessment task is done by someone else, it would be dishonest of you to claim it as your own

Seek Help

If you are not sure about how to cite or reference in essays, reports etc, then seek help from your lecturer, the library or the Academic Learning Centre (ALC)

Produce Original Work

Originality comes from your ability to read widely, think critically, and apply your gained knowledge to address a question or problem
