PMSC20017 *Indirect Threat Care*

Term 2 - 2024

Profile information current as at 13/05/2024 04:47 pm

All details in this unit profile for PMSC20017 have been officially approved by CQUniversity and represent a learning partnership between the University and you (our student). The information will not be changed unless absolutely necessary and any change will be clearly indicated by an approved correction included in the profile.

General Information

Overview

In this unit, you will be introduced to the indirect threat care environment, which signals a shift through risk de-escalation from basic life support to advanced life support treatment methods. You will further your knowledge of the comprehensive trauma assessment of patients, combining the skills of clinical history taking with those of physical examination using a trauma focused primary survey. In addition, you will undertake a review of clinical findings and incorporate differential diagnosis to implement an appropriate treatment plan in preparation for evacuation. Risk mitigation and situational awareness techniques will be added to the clinical assessment to ensure a measured situational response in the event of threat re-escalation.

Assessment Overview

Assessment Grading

This is a graded unit: your overall grade will be calculated from the marks or grades for each assessment task, based on the relative weightings shown in the table above. You must obtain an overall mark for the unit of at least 50%, or an overall grade of 'pass' in order to pass the unit. If any 'pass/fail' tasks are shown in the table above they must also be completed successfully ('pass' grade). You must also meet any minimum mark requirements specified for a particular assessment task, as detailed in the 'assessment task' section (note that in some instances, the minimum mark for a task may be greater than 50%). Consult the [University's Grades and Results Policy](#) for more details of interim results and final grades.

Previous Student Feedback

Feedback, Recommendations and Responses

Every unit is reviewed for enhancement each year. At the most recent review, the following staff and student feedback items were identified and recommendations were made.

Feedback from Student and email interactions

Feedback

Feedback has been overwhelmingly positive albeit informal with no recommendations made through formal avenues. Some students comment on the concise format and length of recorded lectures as a positive.

Recommendation

Recorded lectures will continue to be concise and to the point. New lectures that meet the self-imposed 15-minute maximum length will continue to be added as required in each new unit iteration.

Unit Learning Outcomes

On successful completion of this unit, you will be able to:

1. Formulate a comprehensive tactical primary survey including a clinical assessment of physiological systems.
2. Synthesis data obtained from clinical assessments to construct treatment plans that address and prioritise the major causes of trauma death at an advanced life support level.
3. Discuss the importance of assessing and maintaining operational control and managing patient movement during threat re-escalation.
