PMSC20017 *Indirect Threat Care*

Term 2 - 2025

Profile information current as at 21/11/2024 11:40 pm

All details in this unit profile for PMSC20017 have been officially approved by CQU University and represent a learning partnership between the University and you (our student). The information will not be changed unless absolutely necessary and any change will be clearly indicated by an approved correction included in the profile.

General Information

Overview

In this unit, you will be introduced to the indirect threat care environment, which signals a shift through risk de-escalation from basic life support to advanced life support treatment methods. You will further your knowledge of the comprehensive trauma assessment of patients, combining the skills of clinical history taking with those of physical examination using a trauma focused primary survey. In addition, you will undertake a review of clinical findings and incorporate differential diagnosis to implement an appropriate treatment plan in preparation for evacuation. Risk mitigation and situational awareness techniques will be added to the clinical assessment to ensure a measured situational response in the event of threat re-escalation.

Previous Student Feedback

Feedback, Recommendations and Responses

Every unit is reviewed for enhancement each year. At the most recent review, the following staff and student feedback items were identified and recommendations were made.

Feedback from Student and email interactions

Feedback

Feedback has been overwhelmingly positive albeit informal with no recommendations made through formal avenues. Some students comment on the concise format and length of recorded lectures as a positive.

Recommendation

Recorded lectures will continue to be concise and to the point. New lectures that meet the self-imposed 15-minute maximum length will continue to be added as required in each new unit iteration.
