PODI12009 Podiatry Clinical Practice 1

Term 2 - 2025

Profile information current as at 23/11/2024 07:54 pm

All details in this unit profile for PODI12009 have been officially approved by CQUniversity and represent a learning partnership between the University and you (our student). The information will not be changed unless absolutely necessary and any change will be clearly indicated by an approved correction included in the profile.

General Information

Overview

You will develop and refine your knowledge, skills and abilities regarding podiatric patient history, assessment and non high risk routine care including basic wound care. A number of diagnostic fields will be taken into account such as dermatopathology, radiography, Magnetic Resonance Imaging (MRI), ultrasound, Doppler and bone density. You will have opportunity to apply theory learnt and evidence based practice to aid in diagnosis and management under the guidance of clinical supervision. You will work predominantly with low-risk geriatric patients in the clinical setting.

Previous Student Feedback

Feedback, Recommendations and Responses

Every unit is reviewed for enhancement each year. At the most recent review, the following staff and student feedback items were identified and recommendations were made.

Feedback from Staff feedback

Feedback

Time dedicated to wound assessment and management principles in this unit could be more appropriately spent on foundational podiatry skills

Recommendation

It is recommended that the unit coordinator consider re-evaluating the unit structure to focus more on entry-level podiatry skills in the second-half of the term, rather than wound management principles, to better align the learning materials with the types of patients seen during the second-year internal clinical placements
