General Information

Overview

This unit encompasses a clinical component and a research component. In the clinical component, you will continue to assess, diagnose, manage and treat a range of patients with different lower limb pathologies; including patients with dermatological, vascular, neurological and nail pathologies. In addition, opportunities will be provided to you to advance your podiatric skills and treat patients with sports injuries and other biomechanical concerns. During clinic, you are required to clearly present patient cases and explain the related underlying pathophysiology to your clinical supervisor; including demonstrating your clinical reasoning skills with respect to assessment, diagnosis and management. This unit is the first of the formal requirements of the research project component of the Honours degree. In the research component you will complete a research proposal and identify a research project through your analysis of the literature that will be carried out in the fourth year of the course.
