General Information

Overview

This unit aims to equip you with the necessary knowledge, skills, and abilities to manage strategic initiatives within an organization effectively. This unit will introduce you to the concepts, principles, life cycles, and performance domains of portfolio and program management. This unit will specifically address how organisations apply management techniques to initiate, select, prioritise, and execute projects and programs within a portfolio contributing effectively to the organisational success through strategic alignment, resource optimisation, risk management, stakeholder engagement, benefits realisation, monitoring, and control. This unit will also introduce you to systems thinking concepts, principles, and tools that help solve complex problems within portfolios and programs.

Previous Student Feedback

Feedback, Recommendations and Responses

Every unit is reviewed for enhancement each year. At the most recent review, the following staff and student feedback items were identified and recommendations were made.

Feedback from Lecturer feedback.

Feedback

The number of assessments should be reduced from four to three to prevent over-assessment of students.

Recommendation

Propose a revision to the unit profile to redesign the assessment structure.

Feedback from SUTE, lecturers' feedback and reflection

Feedback

Although additional learning materials are provided to students via Teams each week, they rarely access or engage with content beyond what is included in the lecture slides.

Recommendation

It is recommended to incorporate blended learning into instructional materials and align these elements with assessments, as students tend to engage more with content that is formally evaluated.
