General Information

Overview

This unit provides postgraduate students with an advanced, interdisciplinary understanding of sustainability and value creation. It focuses on how projects can deliver economic capital while building social capital and preserving natural capital. Students will critically examine and apply leading sustainability standards, principles, and frameworks from Australia and internationally, including the triple bottom line, corporate responsibility, and the business case for sustainability. The unit emphasises the role of projects as vehicles for delivering sustainable value, exploring how economic, social, and environmental considerations shape project delivery throughout the lifecycle. Learners will engage with real-world challenges and develop the skills to lead, innovate, and influence sustainable outcomes in complex project environments.

Previous Student Feedback

Feedback, Recommendations and Responses

Every unit is reviewed for enhancement each year. At the most recent review, the following staff and student feedback items were identified and recommendations were made.

Feedback from Students' evaluation

Feedback

The weekly portfolios are great ways of reflecting on the learning and knowledge gained throughout the unit.

Recommendation

Weekly portfolios as examples of reflective practice greatly contribute to students' learning and achievement of unit learning outcomes. It is recommended to further refine the content and required workload of 'consolidated portfolio' assessment.

Feedback from Students' evaluation

Feedback

The written assessment provides a holistic view of project work in a large asset environment. However, more instructions and guidelines on how to put forward the assessment work would reduce the time spent in preparing it.

Recommendation

Review the content and marking criteria to bring further clarity to the assessment tasks.
