General Information

Overview

This unit will provide you with an introduction to the assessment and treatment of musculoskeletal conditions in the upper limb, head, cervical and thoracic spine for clients across the lifespan. This unit will focus on the development of an evidence based, problem solving approach to the assessment and treatment of common clinical presentations in musculoskeletal practice. The completion of this unit will enable you to apply effective clinical reasoning that underpins your selection and performance of evidence-based and client-centred physiotherapeutic assessment and treatment techniques.

Previous Student Feedback

Feedback, Recommendations and Responses

Every unit is reviewed for enhancement each year. At the most recent review, the following staff and student feedback items were identified and recommendations were made.

Feedback from SUTE Comments

Feedback

Students suggested that the Objective Structured Clinical Exam only permitted assessment of a small number of clinical tests.

Recommendation

It is recommended that the teaching team review the Objective Structured Clinical Exam to reflect how more assessment techniques could be assessed.
