General Information

Overview
Within this clinical placement unit, you will develop your clinical reasoning abilities and practice ethical and professional behaviours. You will achieve this by integrating and using your current knowledge, physical skills and principles of evidence-based practice to function competently to a level of a graduate physiotherapist. The clinical placement associated with this unit will differ from other clinical placement units. It will allow you to develop specific skills within one of the many physiotherapy clinical areas of expertise, across a variety of settings and patient demographics, with an emphasis on effective and patient-centred management plans, within the framework of the International Classification of Functioning, Disability and Health (ICF).
