General Information

Overview

In this unit you will learn how the brain provides the foundation for all psychological processes and behaviour. Specifically, you will study the structure and function of the central nervous system, and how structures in the brain contribute to adaptive information processing. You will gain an understanding of the biological basis of a range of human psychological processes and functions, including perception, language, learning and memory. You will also learn how to critically evaluate the empirical literature and key research methods employed in the field in relation to contemporary theories of cognitive function.

Previous Student Feedback

Feedback, Recommendations and Responses

Every unit is reviewed for enhancement each year. At the most recent review, the following staff and student feedback items were identified and recommendations were made.

Feedback from Student feedback

Feedback

Some students found mind maps challenging to read

Recommendation

Additional efforts will be made to ensure students know how to access the alternate delivery formats (such as A4 notes and Power Point Slides) provided each week

Feedback from Teaching staff observation

Feedback

Some students would benefit from additional support with the essay task.

Recommendation

Dedicate a workshop early in the term to the essay task. Review the task requirements and paragraph structures.

Feedback from Student feedback, HoC observation

Feedback

Most students praised the exceptional teaching quality and excellent learning resources provided.

Recommendation

Maintain the positive changes made to the unit.
