

PSYC12048 Research Methods 2

Term 2 - 2022

Profile information current as at 26/04/2024 10:41 pm

All details in this unit profile for PSYC12048 have been officially approved by CQUniversity and represent a learning partnership between the University and you (our student). The information will not be changed unless absolutely necessary and any change will be clearly indicated by an approved correction included in the profile.

General Information

Overview

Both qualitative and quantitative research skills are highly sought after in many career paths. This unit builds upon Research Methods 1 (PSYC11012) to provide you with the knowledge and skills to conduct and appraise both qualitative and quantitative research in your university and/or professional careers in psychology. The unit will continue to build your skills in critiquing, designing, and analysing qualitative research. It will also further advance your skills related to designing quantitative research, including how to perform basic statistical analyses by hand and using industry-standard computer software. Students who are not confident in their mathematical abilities are encouraged to contact the Academic Learning Centre (ALC) to discuss 'refresher' options.

Details

Career Level: *Undergraduate*

Unit Level: *Level 2*

Credit Points: 6

Student Contribution Band: 7

Fraction of Full-Time Student Load: 0.125

Pre-requisites or Co-requisites

Pre-Requisite Completion of PSYC11012.

Important note: Students enrolled in a subsequent unit who failed their pre-requisite unit, should drop the subsequent unit before the census date or within 10 working days of Fail grade notification. Students who do not drop the unit in this timeframe cannot later drop the unit without academic and financial liability. See details in the [Assessment Policy and Procedure \(Higher Education Coursework\)](#).

Offerings For Term 2 - 2022

- Adelaide
- Bundaberg
- Cairns
- Online
- Rockhampton
- Townsville

Attendance Requirements

All on-campus students are expected to attend scheduled classes – in some units, these classes are identified as a mandatory (pass/fail) component and attendance is compulsory. International students, on a student visa, must maintain a full time study load and meet both attendance and academic progress requirements in each study period (satisfactory attendance for International students is defined as maintaining at least an 80% attendance record).

Website

[This unit has a website, within the Moodle system, which is available two weeks before the start of term. It is important that you visit your Moodle site throughout the term. Please visit Moodle for more information.](#)

Class and Assessment Overview

Recommended Student Time Commitment

Each 6-credit Undergraduate unit at CQUniversity requires an overall time commitment of an average of 12.5 hours of study per week, making a total of 150 hours for the unit.

Class Timetable

[Regional Campuses](#)

Bundaberg, Cairns, Emerald, Gladstone, Mackay, Rockhampton, Townsville

[Metropolitan Campuses](#)

Adelaide, Brisbane, Melbourne, Perth, Sydney

Assessment Overview

1. **Poster Sessions**

Weighting: 30%

2. **Project (applied)**

Weighting: 10%

3. **Portfolio**

Weighting: 60%

Assessment Grading

This is a graded unit: your overall grade will be calculated from the marks or grades for each assessment task, based on the relative weightings shown in the table above. You must obtain an overall mark for the unit of at least 50%, or an overall grade of 'pass' in order to pass the unit. If any 'pass/fail' tasks are shown in the table above they must also be completed successfully ('pass' grade). You must also meet any minimum mark requirements specified for a particular assessment task, as detailed in the 'assessment task' section (note that in some instances, the minimum mark for a task may be greater than 50%). Consult the [University's Grades and Results Policy](#) for more details of interim results and final grades.

CQUniversity Policies

All University policies are available on the [CQUniversity Policy site](#).

You may wish to view these policies:

- Grades and Results Policy
- Assessment Policy and Procedure (Higher Education Coursework)
- Review of Grade Procedure
- Student Academic Integrity Policy and Procedure
- Monitoring Academic Progress (MAP) Policy and Procedure – Domestic Students
- Monitoring Academic Progress (MAP) Policy and Procedure – International Students
- Student Refund and Credit Balance Policy and Procedure
- Student Feedback – Compliments and Complaints Policy and Procedure
- Information and Communications Technology Acceptable Use Policy and Procedure

This list is not an exhaustive list of all University policies. The full list of University policies are available on the [CQUniversity Policy site](#).

Previous Student Feedback

Feedback, Recommendations and Responses

Every unit is reviewed for enhancement each year. At the most recent review, the following staff and student feedback items were identified and recommendations were made.

Feedback from Student feedback

Feedback

High level of support from lecturers.

Recommendation

Continue to engage with students by actively encouraging the use of online forums (and lecturer interaction and timely response to questions), in addition to email and phone communication with students as required.

Feedback from Student feedback

Feedback

Clearer instructions are required on expected writing style in take-home test.

Recommendation

Update take-home test information sheet with more detailed information on writing style. This should include the type of academic writing required in response to each section (e.g., methods sections of research reports).

Unit Learning Outcomes

On successful completion of this unit, you will be able to:

1. Compare and contrast qualitative and quantitative research approaches.
2. Map a thematic analysis of qualitative research data.
3. Calculate and report quantitative data in a professional format.

This unit addresses Foundational Competencies as specified by the Australian Psychology Accreditation Council (APAC). The unit specifically aligns to the following APAC graduate competencies:

- 1.1 Comprehend and apply a broad and coherent body of knowledge of psychology, with depth of understanding of underlying principles, theories and concepts in the discipline, using a scientific approach, including the following topics:
 - i. the history and philosophy underpinning the science of psychology and the social, cultural, historical and professional influences on the practice of psychology; and
 - xii. research methods and statistics.
- 1.2 Apply knowledge and skills of psychology in a manner that is reflexive, culturally appropriate and sensitive to the diversity of individuals.
- 1.3 Analyse and critique theory and research in the discipline of psychology and communicate these in written and oral formats.
- 1.4 Demonstrate an understanding of appropriate values and ethics in psychology.
- 1.6 Demonstrate self-directed pursuit of scholarly inquiry in psychology.

Alignment of Learning Outcomes, Assessment and Graduate Attributes

Alignment of Assessment Tasks to Learning Outcomes

Assessment Tasks	Learning Outcomes		
	1	2	3
1 - Project (applied) - 10%	•		
2 - Poster Sessions - 30%	•	•	
3 - Portfolio - 60%			•

Alignment of Graduate Attributes to Learning Outcomes

Graduate Attributes	Learning Outcomes

Schedule

Week 1 - 11 Jul 2022

Module/Topic	Chapter	Events and Submissions/Topic
Introduction to Qualitative Research A	Braun & Clarke (2013) • Chapter 8: Moving towards analysis	

Week 2 - 18 Jul 2022

Module/Topic	Chapter	Events and Submissions/Topic
--------------	---------	------------------------------

Introduction to Qualitative Research B **Braun & Clarke (2013)**
 • Chapter 12: Quality criteria and techniques for qualitative research

Week 3 - 25 Jul 2022

Module/Topic	Chapter	Events and Submissions/Topic
Quantitative Survey Design, Hypothesis Testing, & Reporting Our Results	Burton et al. (2018) • Chapter 3: Measurement and Validity Foster et al. (2018) • Chapter 7: Introduction to Hypothesis Testing APA Manual (2020) • Chapter 6: The Mechanics of Style	

Week 4 - 01 Aug 2022

Module/Topic	Chapter	Events and Submissions/Topic
Z-scores, Percentiles, & Probability	Foster et al. (2018) • Chapter 4: z-score and the Standard Normal Distribution • Chapter 5: Probability • Chapter 6: Sampling Distributions	

Week 5 - 08 Aug 2022

Module/Topic	Chapter	Events and Submissions/Topic
Chi-square	Foster et al. (2018) • Chapter 14: Chi-square	Non-Linear Map Due: Week 5 Thursday (11 Aug 2022) 11:59 pm AEST

Vacation Week - 15 Aug 2022

Module/Topic	Chapter	Events and Submissions/Topic
--------------	---------	------------------------------

Week 6 - 22 Aug 2022

Module/Topic	Chapter	Events and Submissions/Topic
Correlation	Foster et al. (2018) • Chapter 12: Correlations	Survey Creation Due: Week 6 Thursday (25 Aug 2022) 11:59 pm AEST Calculation portfolio Due: Week 6 Thursday (25 Aug 2022) 11:59 pm AEST

Week 7 - 29 Aug 2022

Module/Topic	Chapter	Events and Submissions/Topic
Regression	Foster et al. (2018) • Chapter 13: Linear Regression	Calculation Portfolio #2 Due Week 7 Thursday (1 September 2022) 11:59 pm AEST

Week 8 - 05 Sep 2022

Module/Topic	Chapter	Events and Submissions/Topic
Unrelated samples t-test	Foster et al. (2018) • Chapter 8: Introduction to t-tests • Chapter 10: Independent Samples	Calculation Portfolio #3 Due Week 8 Thursday (8 September 2022) 11:59 pm AEST

Week 9 - 12 Sep 2022

Module/Topic	Chapter	Events and Submissions/Topic
Related samples t-test	Foster et al. (2018) • Chapter 9: Repeated Measures	Calculation Portfolio #4 Due Week 9 Thursday (15 September 2022) 11:59 pm AEST

Week 10 - 19 Sep 2022

Module/Topic	Chapter	Events and Submissions/Topic
--------------	---------	------------------------------

One-way Independent Groups ANOVA

Foster et al. (2018)
• Chapter 11: Analysis of Variance

Calculation Portfolio #5 Due Week
10 Thursday (22 September 2022)
11:59 pm AEST

Week 11 - 26 Sep 2022

Term Specific Information

The readings from Foster et al. (2018) that are outlined in the Schedule are from an open access textbook. This is a freely-available resource that can be **accessed via the eReading Lists** tab on Moodle.

Assessment Tasks

1 Non-Linear Map

Assessment Type

Poster Sessions

Task Description

You will be given a transcript taken from a focus group. The transcript has been analysed by psychology staff who have undertaken a thematic analysis of the conversation. You will see their notes, their coding, and the themes that they have developed from the transcript.

Your task is to present a poster that shows off those themes in a way that provides a useful and novel way of thinking about the topic that was discussed in the focus group.

You will then write a short commentary on how your representation of the data (the themes) differs from the most common ways of representing quantitative data in a figure.

Assessment Due Date

Week 5 Thursday (11 Aug 2022) 11:59 pm AEST

Return Date to Students

Week 7 Thursday (1 Sept 2022)

Weighting

30%

Minimum mark or grade

50%

Assessment Criteria

You will be assessed against a marking rubric that will focus on two key areas of your learning:

1. Your ability to compare and contrast a qualitative and a quantitative way of presenting research data
2. Your ability to map the results of a piece of thematic analysis through creating a non-linear figure/diagram

WORD LIMIT: Your submission should be no more than 300 words (exclusive of any words contained in your illustration/graphic/figure but inclusive of any text used in your headings). Any words over that limit will not be read or assessed by your marker. See the Psychology Word Count Information on Moodle document for a rationale for this type of word limit restriction.

Referencing Style

- [American Psychological Association 7th Edition \(APA 7th edition\)](#)

Submission

Online

Submission Instructions

There are two elements of your submission: 1. A non-linear thematic map (an illustration/figure/graphic), and 2. A 300-word written summary of how your map has used a different approach to presenting data than is commonly used in quantitative research. Both elements should be incorporated into a single MS Word document. Your illustration/figure/graphic can be created using the SMARTART Graphics tool in MS Word. You can also use any alternative third-party graphics software but you should be aware that the university may not support that software in terms of providing you with technical assistance for its use. Alternatively, you can draw your diagram by hand and paste a photo of it into your Word document.

Learning Outcomes Assessed

- Compare and contrast qualitative and quantitative research approaches.
- Map a thematic analysis of qualitative research data.

2 Survey Creation

Assessment Type

Project (applied)

Task Description

Qualitative data is often used to guide the development of quantitative research questionnaires. For instance, the generalisability of key themes identified from qualitative interviews of a few individuals can be tested using quantitative tools that survey a larger proportion of the population.

For this assessment, you will be required to select and read the qualitative interview transcript provided and the themes that have been extracted from this. You will then formulate 5 survey questions that reflect these themes and could be used to assess the extent to which other people relate to this experience reflected in these themes.

Assessment Due Date

Week 6 Thursday (25 Aug 2022) 11:59 pm AEST

Return Date to Students

Week 8 Thursday (8 Sept 2022)

Weighting

10%

Assessment Criteria

2 marks are available for each of the 5 survey items (**10 marks in total**):

- **1 mark** for a well-constructed survey item.
- **.5 mark** for an explanation of why the questions works well (vs other options).
- **.5 mark** for a description of a scenario where someone might misinterpret this survey item.

Referencing Style

- [American Psychological Association 7th Edition \(APA 7th edition\)](#)

Submission

Offline

Submission Instructions

Please complete your assessment using a document processor (e.g., Word) then upload your submission to Moodle.

Learning Outcomes Assessed

- Compare and contrast qualitative and quantitative research approaches.

3 Calculation portfolio

Assessment Type

Portfolio

Task Description

You will be required to complete 6 Calculation Portfolio tasks, each worth 10% of your final grade. Four of these tasks will require you to perform statistical hand calculations by hand and the other 2 tasks will require you to perform statistical calculations using computer software.

Calculation Portfolio Tasks #1, #2, #4, and #5 are the tasks that require you to **perform statistical calculations by hand**. You will have TWO attempts at each of these tasks and the attempt with the highest score will be awarded as your final mark. You will have 2 hours to complete each attempt.

Calculation Portfolio Tasks #3 and #6 will require you to perform **statistical calculations using computer software**. You have ONE attempt for each of these tasks.

The due dates, type of calculation (hand, computer), and content assessed in each of these are as follows:

- **Portfolio #1** ([due Week 6](#)) will be a hand calculation **based on material from Week 5**
- **Portfolio #2** ([due Week 7](#)) will be a hand calculation **based on material from Week 6**
- **Portfolio #3** ([due Week 8](#)) will be a computer calculation **based on material from Week 7**
- **Portfolio #4** ([due Week 9](#)) will be a hand calculation **based on material from Week 8**
- **Portfolio #5** ([due Week 10](#)) will be a hand calculation **based on material from Week 9**
- **Portfolio #6** ([due Week 11](#)) will be a computer calculation **based on material from Week 10**

Assessment Due Date

Week 6 Thursday (25 Aug 2022) 11:59 pm AEST

Calculation task #1 is due 11:59 pm (AEST) on 25/08/2022; Calculation task #2 is due 11:59 pm (AEST) on 01/09/2022; Calculation task #3 is due 11:59 pm (AEST) on 08/09/2022; Calculation task #4 is due 11:59 pm (AEST) on 15/09/2022; Calculation task #5 is due 11:59 pm (AEST) on 22/09/2022; Calculation task #6 is due 11:59 pm (AEST) on 29/09/2022;

Return Date to Students

Week 7 Thursday (1 Sept 2022)

For the hand calculation tasks (i.e., #1, #2, #4, and #5), grades will be made available in Moodle immediately after completion of each task. Detailed feedback will be given when each assessment closes (see DUE DESCRIPTION dates above). Feedback on the computer calculation tasks (i.e., #3 and #6) will be returned approximately 2 weeks from the due date.

Weighting

60%

Minimum mark or grade

50% (across all 6 portfolio tasks)

Assessment Criteria

There are 2 different types of calculations that you will be required to complete as part of this assessment portfolio: 4 where you perform the calculation by hand and 2 where you perform the calculation using a computer statistics program.

Calculation Portfolio Tasks 1, 2, 4, and 5 are based on **hand calculations**. Each of these tasks will each be graded out of 10. You will receive 1 mark for each correct answer. Please see practice tasks and feedback on Moodle for further details on what kind of answers are expected on these assessments.

Calculation Portfolio Tasks #3 and #6 are based on **computer calculations using statistical software**. Each of these tasks will each be graded out of 10. Marks will be allocated, according to the following criteria:

1. Selection of an appropriate statistical analysis for the given data (**2 marks**)
2. Justification for the choice of statistical test (**2 marks**)
3. Results reported and interpreted correctly (**4 marks**)
4. Results written according to American Psychological Association (APA) standards (**2 marks**)

Referencing Style

- [American Psychological Association 7th Edition \(APA 7th edition\)](#)

Submission

Online

Submission Instructions

Please complete your hand calculation tasks (i.e., 1, 2, 4, and 5) online via Moodle. Please complete your computer calculation tasks using a document processor (e.g., Word) then upload your submission to Moodle.

Learning Outcomes Assessed

- Calculate and report quantitative data in a professional format.

Academic Integrity Statement

As a CQUniversity student you are expected to act honestly in all aspects of your academic work.

Any assessable work undertaken or submitted for review or assessment must be your own work. Assessable work is any type of work you do to meet the assessment requirements in the unit, including draft work submitted for review and feedback and final work to be assessed.

When you use the ideas, words or data of others in your assessment, you must thoroughly and clearly acknowledge the source of this information by using the correct referencing style for your unit. Using others' work without proper acknowledgement may be considered a form of intellectual dishonesty.

Participating honestly, respectfully, responsibly, and fairly in your university study ensures the CQUniversity qualification you earn will be valued as a true indication of your individual academic achievement and will continue to receive the respect and recognition it deserves.

As a student, you are responsible for reading and following CQUniversity's policies, including the [Student Academic Integrity Policy and Procedure](#). This policy sets out CQUniversity's expectations of you to act with integrity, examples of academic integrity breaches to avoid, the processes used to address alleged breaches of academic integrity, and potential penalties.

What is a breach of academic integrity?

A breach of academic integrity includes but is not limited to plagiarism, self-plagiarism, collusion, cheating, contract cheating, and academic misconduct. The Student Academic Integrity Policy and Procedure defines what these terms mean and gives examples.

Why is academic integrity important?

A breach of academic integrity may result in one or more penalties, including suspension or even expulsion from the University. It can also have negative implications for student visas and future enrolment at CQUniversity or elsewhere. Students who engage in contract cheating also risk being blackmailed by contract cheating services.

Where can I get assistance?

For academic advice and guidance, the [Academic Learning Centre \(ALC\)](#) can support you in becoming confident in completing assessments with integrity and of high standard.

What can you do to act with integrity?

Be Honest

If your assessment task is done by someone else, it would be dishonest of you to claim it as your own

Seek Help

If you are not sure about how to cite or reference in essays, reports etc, then seek help from your lecturer, the library or the Academic Learning Centre (ALC)

Produce Original Work

Originality comes from your ability to read widely, think critically, and apply your gained knowledge to address a question or problem
