General Information

Overview

The human brain is a marvelous and complex organ that allows us to perceive the environment, plan courses of action, and engage in adaptive behaviours. Most of the time, these processes are carried out smoothly and efficiently allowing us to function optimally. However, there are times and circumstances where the brain does not operate as it should. In this unit you will examine mental health disorders which frequently have significant adverse impacts. Mental illness will be explored in the context of major diagnostic systems and treatment models. Using a bio-psycho-social approach, you will explore the aetiology and course of psychopathology and consider evidence-based treatments used to facilitate recovery.

Previous Student Feedback

Feedback, Recommendations and Responses

Every unit is reviewed for enhancement each year. At the most recent review, the following staff and student feedback items were identified and recommendations were made.

Feedback from Student email

Feedback

Some student identified that a couple of questions in the quiz were unclear.

Recommendation

Continue to revise any quiz items that need clarification

Feedback from Student email. SUTE comments

Feedback

Some students had challenges in uploading the recorded video assessment.

Recommendation

Revise the uploading procedure for recorded video assessments. Emphasise to students that Echo360 - Moodle is the only acceptable method for submitting video assessments. Encourage students to upload the assessment early and contact TaSAC with any problems.

Feedback from SUTE comments

Feedback

Some students requested more video resources to be placed in the weekly Moodle tiles.

Recommendation

Source additional video resources and include current links in Moodle.
