General Information

Overview

The discipline of psychology has a long history of using research and theory to provide explanations for the complexities of human behaviour. Yet, we live in a world that is rapidly changing – environmentally, socially, politically, and technologically. In this unit, you will learn how psychology is responding to contemporary challenges, particularly when it comes to diverse and vulnerable groups in our society. You will be exposed to critical and emerging issues in the study of psychology. Drawing on a scientist-practitioner approach, you will examine how psychological theory and research can be applied to the identification and evaluation of solutions to these challenges.
