Profile information current as at 08/05/2024 02:03 pm

All details in this unit profile for PSYC20045 have been officially approved by CQUniversity and represent a learning partnership between the University and you (our student). The information will not be changed unless absolutely necessary and any change will be clearly indicated by an approved correction included in the profile.

General Information

Overview

Applied Positive Psychology Project B is the second of two integrated units. In these units, you will plan, design and undertake a research project - either a systematic review (Option 1) or research study (Option 2) - in a positive psychology/wellbeing and/or resilience-related field. Stage 2 of the process will occur in this unit and involves undertaking, under the supervision of a qualified Academic supervisor, the systematic review or research study that you developed in Stage 1 (PSYC20044: Applied Positive Psychology Project A) of the two integrated units. In this unit, you will either: • Conduct your systematic review (Option 1) or • Implement your research study (Option 2), which will involve either collecting and assessing new quantitative, qualitative or mixed-methods data, or utilising an existing dataset. At the completion of your project, you will submit your systematic review or research study in journal article format.
