General Information

Overview

This unit is the first of two units in which you will learn how professional knowledge of research and theory can be applied to practice related to high-prevalence psychological disorders across the lifespan, inclusive of culturally diverse populations. As a result, you will learn to conceptualise contemporary psychology cases and to formulate a treatment plan to help your clients. Specifically, this unit uses case-based learning to develop competency in self-reflective practices and the application of diagnostic classification systems to high prevalence psychological disorders, including the critical evaluation of diagnostic systems of taxonomy.

Previous Student Feedback

Feedback, Recommendations and Responses

Every unit is reviewed for enhancement each year. At the most recent review, the following staff and student feedback items were identified and recommendations were made.

Feedback from Student Evaluations.

Feedback

Students commented that there were too many readings for some weeks and it was not clear how they all complemented the lecture topic.

Recommendation

The weekly reading list will be reviewed to ensure the amount of pre-reading required is appropriate and that readings clearly link to the lecture topic.

Feedback from Student Evaluations, Moodle & Class.

Feedback

Students enjoyed the case-based learning and group work approach, particularly in relation to the collaboration with peers.

Recommendation

Retain the case-based learning and group work approach.

Feedback from Student Evaluations, Moodle & Class.

Feedback

Students reported finding the group assessment schedule confusing and difficult to follow.

Recommendation

The group assessment schedule will be reviewed to support clarity for students.
