General Information

Overview

This unit is the first of two units in which you will learn how professional knowledge of research and theory can be applied to practice related to high-prevalence psychological disorders across the lifespan, inclusive of culturally diverse populations. As a result, you will learn to conceptualise contemporary psychology cases and to formulate a treatment plan to help your clients. Specifically, this unit uses case-based learning to develop competency in self-reflective practices and the application of diagnostic classification systems to high prevalence psychological disorders, including the critical evaluation of diagnostic systems of taxonomy.

Previous Student Feedback

Feedback, Recommendations and Responses

Every unit is reviewed for enhancement each year. At the most recent review, the following staff and student feedback items were identified and recommendations were made.

Feedback from Student Evaluations

Feedback

Students stated that recording the live lectures would allow them to review the lectures if further clarity is needed or to deepen their understanding of content.

Recommendation

It is recommended that the live lectures are recorded.

Feedback from Student Evaluations

Feedback

Students suggested that examples of how psychopathologies present, through video format, would be useful for their learning and understanding.

Recommendation

It is recommended that the current learning materials are expanded on, and videos are used to aid students learning of the presenting features of the covered psychopathologies.

Feedback from Student Evaluations

Feedback

Students questioned the relevance of developing a pamphlet for their future professional practice, suggesting a review of Assessment 1.

Recommendation

It is recommended that the teaching team review Assessment 1 to ensure that the modality chosen aligns practically with the skills needed in practice.
