General Information

Overview

This unit is intended to provide you with advanced knowledge and skill acquisition at Australian Psychology Accreditation Council (APAC) Accreditation Standards Level 4, which represents professional and specialised areas of practice competencies necessary for working as a Clinical Psychologist. Specifically this unit aims to build your competency in assessment research, theory and practice of more complex psychological pathology and presentations. This will include specific focus on more advanced cognitive assessment techniques, including neuropsychological screening and assessment. You will build knowledge and skills specific to culturally-responsive reflective practice approaches in complex psychological assessment, which will be integrated throughout the teaching, learning and assessment within this unit.

Attendance Requirements

All on-campus students are expected to attend scheduled classes – in some units, these classes are identified as a mandatory (pass/fail) component and attendance is compulsory. International students, on a student visa, must maintain a full time study load and meet both attendance and academic progress requirements in each study period (satisfactory attendance for International students is defined as maintaining at least an 80% attendance record).

Website

[This unit has a website, within the Moodle system, which is available two weeks before the start of term. It is important that you visit your Moodle site throughout the term. Please visit Moodle for more information.](#)

Previous Student Feedback

Feedback, Recommendations and Responses

Every unit is reviewed for enhancement each year. At the most recent review, the following staff and student feedback items were identified and recommendations were made.

Feedback from Student SUTE feedback.

Feedback

A student suggested that the third Assessment Task - the Case Study Report - could be broken down into steps with each step being a focus of attention in weekly classes. This would allow students to apply their learning as they progress through the unit.

Recommendation

Review the structure and timing of the assessment task with a view to covering some of the specific psychometric tests in weekly classes. This will need to include sufficient flexibility for the weekly curriculum content to be relevant to a new case study for each year's Assessment Task.

Feedback from Lecturer reflection on unit.

Feedback

Learning resources need to be expanded. Due to a major revision of this unit there were not a lot of resources available to be uploaded to Moodle and the Psychology wellness centre did not have all tests taught in the unit.

Recommendation

Review the weekly content and source additional learning resources for Moodle. Consider whether additional relevant psychometric tests could be added to the Psychology Wellness Centre test library so that students can practice these tests in or between classes.
