SCIE29001 *Sustainability in Practice*
Term 2 - 2026

Profile information current as at 05/12/2025 03:35 pm

General Information

Overview

In this unit, you will immerse yourself in real-world sustainability challenges, applying the theoretical knowledge you've gained to hands-on experiences. This unit includes a mandatory residential school where you will engage directly with sustainable practices in various environments. During the residential school, you will participate in a range of practical activities that build your skills in sustainability. You will work on projects such as sustainable agriculture, renewable energy systems, water management, waste reduction, and eco-friendly construction techniques. By collaborating with experts in the field, you will learn to implement sustainable solutions, assess their effectiveness, and understand the complexities of integrating sustainability into different contexts. This double credit point capstone unit will help you develop a comprehensive understanding of sustainability principles and their applications. You will enhance your problem-solving abilities, teamwork, and project management skills, all of which are critical for successful careers in sustainability-related fields. This unit is your opportunity to make a tangible difference in sustainability, gaining the hands-on experience necessary to drive change in your community and profession.
