## General Information

### Overview

During this unit you will complete and present your research project work as a thesis containing scientific scholarly works such as a manuscript intended for submission in peer-reviewed journals and/or industry reports, and as an oral thesis presentation and defense. Particular emphasis will be placed on succinct and clear presentations of background literature, project design, analytical methods, findings, conclusions and implications of your work, by written and oral means.

### Assessment Overview

#### Assessment Grading

This is a graded unit: your overall grade will be calculated from the marks or grades for each assessment task, based on the relative weightings shown in the table above. You must obtain an overall mark for the unit of at least 50%, or an overall grade of 'pass' in order to pass the unit. If any 'pass/fail' tasks are shown in the table above they must also be completed successfully ('pass' grade). You must also meet any minimum mark requirements specified for a particular assessment task, as detailed in the 'assessment task' section (note that in some instances, the minimum mark for a task may be greater than 50%). Consult the [University's Grades and Results Policy](#) for more details of interim results and final grades.

## Previous Student Feedback

### Feedback, Recommendations and Responses

Every unit is reviewed for enhancement each year. At the most recent review, the following staff and student feedback items were identified and recommendations were made.

#### Feedback from Staff reflection

##### **Feedback**

The Unit Coordinator maintained regular contact with students and provided additional support and advice as required to assist students with progressing with their honours projects.

##### **Recommendation**

It is recommended that the Unit Coordinator continues to provide support to students as they finalise their Honours project.

## Unit Learning Outcomes

**On successful completion of this unit, you will be able to:**

1. Describe and defend the application of relevant methodology to the design of a project
2. Critically analyse scientific works and scholarly readings in your research area
3. Communicate research to both specialist and non-specialist audiences, using terminology appropriate to the audience
4. Prepare scientific scholarly outputs suitable for publication in peer-review journals or as an industry technical report
5. Apply discipline specific analytical approaches to collected research data.
